Roth QuickStop Pro2 Leak Detector User Guide

WHAT DO I DO WHEN...?

We are home – set operating mode to HOME We are traveling – set operating mode to AWAY We are using a lot of water – set operating mode to PAUSE

WHAT SHOULD I DO ABOUT ...?

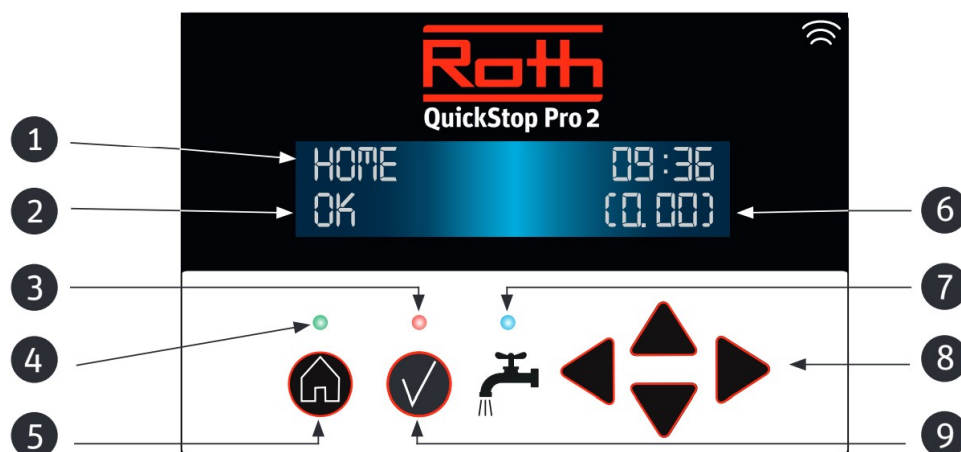

WARNING – clear the warning and and then check the cause.

ALARM – First check the cause. Ensure there is no visible leakage. Take action if needed. Turn the water back on by clearing the alarm.

Find the leak detection guide on www.Roth.Support/QuickStop_UK

In case of repeated alarms the cause must be carefully investigated.

1. **1+4**: Current operating mode lights up
continuously = HOME
Flashes quickly = AWAY
Flashes slowly = PAUSE
2. **Unit status** – **OKAY**, **WARNING**, **ALARM** or remaining time in **PAUSE** mode.
Find current status for Tightness test, Flow test and Quick test by pressing the “down arrow” key.
3. Flashes on **WARNING** before the water is shut off. Lights up continuously on **ALARM** and the water is shut off.
4. Press for toggling between HOME/AWAY mode. Keep the button pressed to go to PAUSE mode, in order to consume water for a longer time period without getting an alarm.
5. The higher index value the more activity has been registered in the installation. The alarm limit is set to 1.00 as default.
6. The flow indicator flashes immediately after a short activity and lights up continuously in conjunction with a longer flow.
7. With the “arrow keys” up/down you scroll through the status pages and the installation menus. Save the setting with the “arrow right” key, go back with “arrow left” key.
8. Press to silence the alarm sound. Keep it pressed to clear the alarm.
