Rotor Riot Game Controller

Product Overview:

LIGHTNING CONNECTION

Ensure your phone is safe and secure in the provided mobile device holder, then connect your device using the built in Lightning connected cable. Alternatively you can connect the built in cable directly to a device without

using the device holder. There are tabs on the mobile device holder for simple wire management.

DEVICE HOLDER POST

Unscrew the the locking nut and remove. Place the mobile device holder so the rectangle opening is flush with the raised section. Replace nut and screw back on, be careful not to over tighten.

LED LIGHTS

The LEDs are built in for future multiplayer functionality. The first light will illuminate briefly to indicate controller connection.

PASS THROUGH CHARGING

While the Rotor Riot controller is connected to your iOS device, connect the power source via the Lightning receptacle on your controller to charge your phone or tablet while playing.

SUPPORT

For customer support for your Rotor Riot controller please contact support@RotorRiotPlay.com

WARNING

We buy our components from Apple, MFi (the Apple regulations) specify that the lightning connector **MUST** break if forced in the wrong direction (either through dropping or rough handling) to ensure no damage is sustained by the phone.

With this in mind extra care should be taken to avoid rough handling to prevent breaking.
