### **Product Application:**

This product adopts 2.4G wireless signal with strong penetrating ability and wide coverage, which is used to control the controller box to regulate the flow of water pump.

### **Technical Parameter:**

1 Remote distance ≥30M 2 Power Supply: 2 X 1.5 V AAA Battery

Product Certificate: FCC, FCC ID: 2A9I8-221212

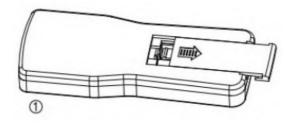

### **Function Instruction:**

- Step 1: Press 1 Power button to turn on variable speed controller.
- Step 2: Press 2 Mode button to choose modes, manual mode, timer mode and cycle mode available.
- Step 3: Long press **3** Timer button for 2 seconds to set corresponding water flow of on/off time If you want regulate the water flow or adjust the time, please press **4** UP/ **5** Down button.
- Step 4: Long Press 6 Clock button for 2 seconds to set local time

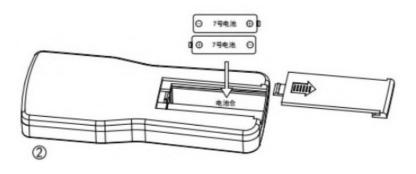

## **Battery Installation:**

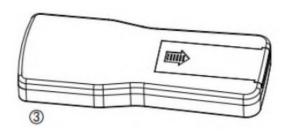

Step 1: Slide off the battery cover via the arrow direction

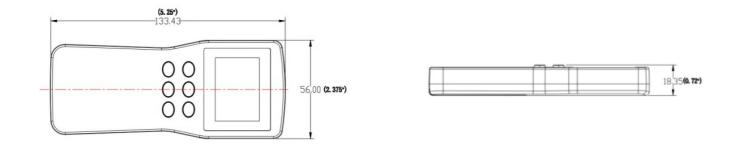

Step 2: Install battery

Step3: Put the cover back

### **Product Dimension:**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

#### **FCC Caution:**

Changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

#### **FCC Statement:**

"This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help."
