Getting Started

1. Mount Tombo360 onto mirror using provided straps

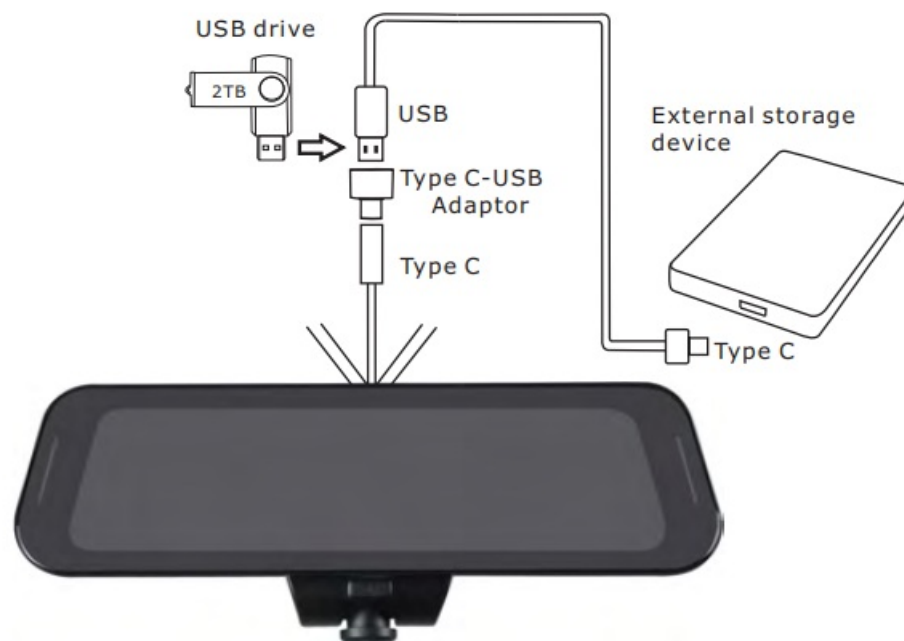

2. Route GPS antenna and Plug power adaptor into cigarette lighter

*Reverse trigger: Connect only if TOMBO ProKit 1 is purchased and the rear camera is connected.

3. Backup Function(To SSD or USB drive)

Note:

When using an external storage device to store the transferred files, you must first format the storage device using your PC in “exFAT” file system format.

Touchscreen Operation

4. Main User interface

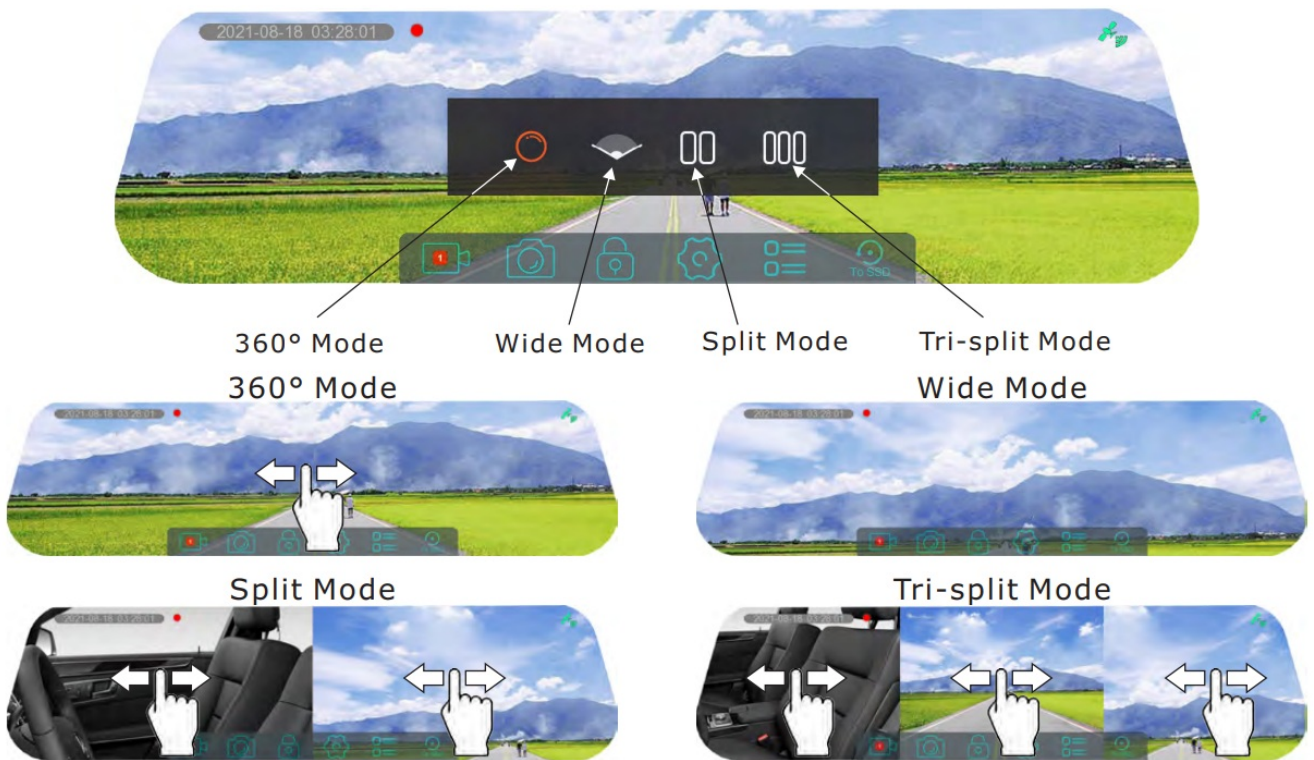

5. Settings

Note: To enter Settings, you must stop recording.

6. Modes

Note:

In wide mode, the front camera should be facing forward to give you a super wide viewing angle. Viewing angle adjustment is not available within this mode.

Dash camera defaults back to the original view setting (DIY installation).

Dash camera will memorize the last view setting (ProKit 1 installation).

Power Button Operation

7. Short press to (turn On/Off) the LCD Monitor. Long press to Power On/Off.

Note: For vehicles in which the cigarette lighter retains power when the key is Off. Please refer to Pg.26 of the Owner's Manual.
