SALUS CONTROLS UG800 Splitte Universal Gateway

Product Information

Specifications

- **Model:** UG800
- **Frequency Range:** 2405-2480MHz
- **Compliance:** 2014/30/EU, 2014/35/EU, 2014/53/EU, 2011/65/EU

Product Usage Instructions

Installation

1. Choose a suitable location for the Universal Gateway within the range of your devices.
2. Connect the Universal Gateway to a power source using the provided power adapter.
3. Follow the pairing instructions in your device's user manual to connect it to the Universal Gateway.

Configuration

1. Access the device settings through the companion app or web interface.
2. Follow the on-screen instructions to configure the Universal Gateway according to your preferences.
3. Ensure all connected devices are properly recognized and linked to the gateway.

Troubleshooting

If you encounter any issues during setup or usage, refer to the troubleshooting section in the user manual or contact customer support for assistance.

Frequently Asked Questions (FAQ)

- **Q: What should I do if my devices are not connecting to the Universal Gateway?**

A: Make sure the devices are within range, restart both the devices and the gateway, and reattempt the pairing process.

- **Q: Can I use the Universal Gateway with devices from different manufacturers?**

A: Yes, the Universal Gateway is designed to work with a variety of devices regardless of the manufacturer.

UNIVERSAL GATEWAY

Model: UG800

Installation Manual

Don't use CO10RF coordinator with UG800 simultaneously!

Introduction

The NEW Universal Gateway is the key product for the SALUS Smart Home and supports cloud integration to AWS IoT and other cloud platforms with firmware customization. This will offer you an ideal solution for connecting multiple Zigbee wireless devices to the cloud in a smart home system by using your smartphone or your computer via Internet. You can connect up to 200 devices to one gateway.

Go to www.saluscontrols.com for the PDF version of the manual.

Product Compliance

This product complies with the essential requirements and other relevant provisions of Directives 2014/30/EU, 2014/35/EU, 2014/53/EU and 2011/65/EU. The full text of the EU Declaration of Conformity is available at the

following internet address: www.saluslegal.com.

2405-2480MHz; <20dBm (Wifi)

Safety Information

Use in accordance with the regulations. Indoor use only. Keep your device completely dry. The AC/DC adaptor should plug into the socket outlet which must be located close to the device and must be easily accessible. The gateway has an IP30 rating. Disconnect your device before cleaning it with a dry cloth. The equipment is only suitable for mounting at heights ≤ 2 m. Use only power supplies listed on the back cover. Maximum operating ambient temperature is 40°C.

- After the gateway was activated, the application will automatically go to the Dashboard and the three LEDs on the gateway will light up solid green.

Installation in Offline mode (without Internet connection)

To start the system installation press and hold the button for 5 seconds until ZigBee LED turn solid orange. This means the ZigBee network is ready to accept Salus Premium devices.

Note: It's highly recommended to refer to individual devices manuals before starting installation process for each of them.

When everything is paired press and hold the button for 5 seconds till the ZigBee LED will turn solid green. If you want to replace or add new devices, please ensure you follow steps 2 to 3.

Note: If you want to change Offline mode to Online mode, you must find equipment via application. All system setting will be automatically moved into SALUS cloud server. You don't need to do installation again in Online mode.

Changing the connectivity from LAN to WiFi

To change the connectivity from LAN to WiFi, follow the below steps.

- **WiFi SSID:** the name of your network (Case sensitive)
- **WiFi Password:** the password of your network

Note: The WiFi Internet connection might not be as stable as the one on cable.

Checking system configuration

To check which devices of your system are paired and have been configured correctly, you can use Identify mode. Press the button to activate Identify mode. The UG800 gateway will put all equipment that is connected to your system into Identify mode. Press the button again to cancel the Identify process. Identify mode will time out after 10 minutes.

Factory Reset

Restoring factory settings in the UG800 gateway will delete all settings and devices paired with it from its memory. To do this, use paper clip or a pin to press and hold the button for about 10 seconds until all LED's glows orange and release it.
