Improved Locking Collar Installation

- We've take your feedback on board and improved the way that the collars on this product are fixed to the axle, this will ensure a quicker and more precise installation on-site.
- Please take care to follow the important steps outline below.
- The position of the pre-fixed collars has been adjusted so that the second collar in each pair now lines up with the pre-punched holes on the axle (see Drawing A).
- This means it is no longer necessary to drill a pilot hole when fixing the second collar to the axle.

IMPORTANT: When attaching the collars, make sure that the fixing has fully engaged with the pre-punched hole on the axle (see Drawing B).

The collar should fit tightly to the axle. Ensure that there is:
