Instructions about the WEEE Correct Disposal of This Product (Waste Electrical & Electronic Equipment)
(Applicable in countries with separate collection systems)

This marking on the product, accessories, or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling. Business users should contact their suppliers and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal. For more information on safe disposal and recycling, visit our website www.samsung.com or contact our Helpline numbers on the last page.

Features

- Air Turbo Drying System
  - Air Turbo technology spins hard and fast so you can spend less time drying.
  - Time-saving AIR TURBO saves your time, ensuring your clothes are dried 30%-40% faster than line drying alone. Especially during the rainy season and in high-humidity weather, laundry that once took days to drip-dries, such as heavy jeans, bulky sweaters, and thick blankets are dried more rapidly.
  - Easy-to-iron AIR TURBO is perfect for delicates and clothes made of synthetic fabrics. No more hanging and waiting. Simply iron straight-out-of-the washer, since AIR TURBO eliminates just enough moisture to keep clothes adequately damp for ironing.

- Transparent Window (option)
  - This Transparent Window is the new concept to solve the curiosity of users to see inside washing machines while operating. While operating, the laundry progress inside of the washing machine can be checked by looking through the transparent window.

- Hexa Storm Pulsator
  - Hexa storm pulsator results in effective washing performance with fabric care.
  - The 6 blades create multi-directional water flow and 3 rollers and 2 sideboards have a series of ridges that give a scrub wash effect with less fabric damage

- Magic Fitter
  - This unique Magic Fitter ensures that all the lint inside the tub is captured for top quality filtering results to deliver consistently effective cleaning results.

- Magic Mixer
  - You don't need to manually stir the harsh detergent with hand. With Magic mixer, just put water and detergent and set a magic mixer on the panel. Samsung Hexa storm generates strong water current and mixes the detergent into the water thoroughly

Safety instructions

- Must follow the cautions and precautions for safety intended to prevent unpredictable danger and damage by helping the proper use in safety.
- Be sure that the washing machine is grounded.
  - To avoid electrical shock, use a metal pipe for the ground connection. But, don't ground the washing machine with gas pipes or telephone lines to avoid the dangers of explosion or lightning strike.

- Do not put your hands into the spin dryer basket when it is spinning.
  - Your fingers can be caught by spinning laundry and damaged.

- Never allow children to operate or play with the washing machine.
Children playing with the washing machine may accidentally fall into the washing tub.

- Do not climb up the Washing Machine or lids (Wash and Spin Lid)
- Disconnect the power cord from the power supply when not in use.
- Ventilation opening must not be obstructed by carpeting when the washing machine is installed on a carpeted floor.
- If the supply cord is damaged, it must be replaced by the manufacturer, its service agent, or similarly qualified persons in order to avoid a hazard.
- To avoid overfilling and damages this appliance must be filled with the operator present using a moderate water supply pressure only.
- For washing machines with ventilation openings in the base, that a carpet must not obstruct the openings.
- Do not use an adapter or extension cord to supply power to your washing machine.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

⚠️ Precautions when operating

- Don’t use excessively hot water, (50°C or more) Plastic parts may be deformed or damaged. Also, clothing may be deformed or decolored.

⚠️ Do not connect to the hot water supply.

- Before washing, check all pockets. If nails or pins remain in pockets, they may damage the washing machine or clothes.
- Close the water tap a little if the water pressure is too high.
- To avoid water splashes, close the wash tub lid.
- Never splash water on the control panel.
- Take out personal belongings from pockets.

Check the pockets! Hairpins and coins cause damage to clothes and washing machine. They make noise and problems to the machine. Must check the pocket.

⚠️ Do not put clothes with such substances in the AiniON tub like keys, pins, nails, sharp items, coins. Kindly ensure that all metallic buckles/zippers/hooks must be turned inside.

- Be sure to cover Inner Lid with the inner cover on laundry before the cover spinning. This prevents laundry from being tossed out and damaged.

- Be sure to lay the drain hose(A) down.

- Don’t pull off the Knobs. Knobs can’t take off from outside of the Panel.
- Do not pour caustic soda & bleach over the washing machine. It causes damages to rubber parts.
- Do not expose the washing machine to direct sunlight or rain.

Description of parts
1. INLET HOSE
2. WASH/SPIN INLET SELECTOR
3. PLASTIC FILTER
4. TWIN TUB
5. WASH LID
   Be sure to keep the lid closed during washing and spinning.
6. DRAIN HOSE
7. PULSATOR
8. SPIN TUB
9. POWER CORD
   The plug's shape may not correspond with this drawing.
10. INNER LID
11. SPIN LID
   When you open this lid while the spin basket is spinning, the spinning will be stopped by the brake
12. MAGIC FILTER
   Lint will be collected in the filter during washing.

Control panel

WT95A4200LL / WT95A4200RR

1. WASH TIMER
   This is used to set the wash time 1-45 minutes.
2. WASH SELECTOR
   This is used to select wash action.
3. DRAIN SELECTOR
   This is used to select the Washing / draining.
4. SPIN TIMER
   This is used to set the spin time, 1-10 minutes
5. WATER SELECTOR
   This is used to direct water supply to washtub for washing or spin tub for a spin shower.

Installation

Environment

- Leave some space. Space at least 15 cm between the washing machine and the wall.
- Place the washing machine on a sturdy flat

If the washing machine is placed on an uneven or weak surface, noise or vibration may occur. (Allowable is 2°)

- How to move the Machine

Casters are provided for easy translocation of machines. Hold the machine properly as shown in fig. Be Careful that the machine should not be dropped. The machine should not be moved when loaded.
Never install the washing machine near water. Do not place the washing machine in steamy rooms or where the washing machine is directly exposed to rain. Moisture may destroy the electrical insulation and cause an electrical shock. Avoid direct sunlight or heating devices. As plastic and electrical components are affected by direct heat, never place the washing machine near heaters, boilers, etc. Do not place under direct sunlight.

Connecting the drain hose
General type
1. Press and hold down the joint ring, and insert it into the drain hose.
2. Insert the drain hose into the drain outlet. Make sure to connect them firmly using the joint ring.
3. Push it with force further to the bottom of the drain outlet.
4. Check the drain hose for not getting apart from the outlet by drawing it.

Connecting the inlet hose
The new hose-sets supplied with the appliance are to be used and that old hose-sets should not be reused.

Cleaning the machine
Cleaning the Magic filter
Clean the filter net often to keep the washing machine clean.
1. Push the upper part of the Magic filter and pull in.
2. Open the cover as shown in the figure.
3. Clean the Magic filter
4. Close the cover and insert the lower part of the filter in the basket first and then push the filter with ‘dick’ sound.

Cleaning the washtub
1. Wipe off stains on the cabinet and operation panel with a soft cloth.
2. Do not use benzene, thinners, cleanser, or wax, nor scrub the washing machine with a brush. Painted surfaces or plastic parts will be damaged.
3. When cleaning doesn’t spray water directly to the parts of the washer. It may make its life span shorten. Also an electric shock or fire may take place.
washing procedure

washing

1. Before starting washing, check the following;
   - Connect the water inlet hose and open the water tap.
   - Connect the power cord to the power supply.
   - Lay the drain hose(A) down toward a sinkhole.

2. Set the WASH SELECTOR KNOB to the desired mode.

3. Set the DRAIN SELECTOR KNOB to ‘WASH’.

4. Set the LEVEL WATER SELECTOR to WASH

5. Load laundry in the wash

6. Fill water in the washtub and add the detergent.

7. Set the WASH TIMER.
   Set the Wash Timer 1-45 min.
   (Set the Wash Timer to a point between 15 to 45 mins for soak function).

SOAK FUNCTION(option)

If the WASH TIMER is set to a point between “15” to “45”, the washing machine starts the wash (15 min), after the soak (30.0 min) is completed. The Soak function (30.0min) repeats the cycle that is 1.5-2.0 min on washing.

8. After washing, set the DRAIN SELECTOR KNOB to ‘DRAIN’ for a drain.

Spinning dry

1. Transfer the clothes into the spin basket and arrange the clothes evenly.
2. Be sure to attach the safety cover and close the inner lid.

3. Close the spin dryer lid.

4. Set the SPIN DRYER TIMER 1-10 minutes. 1-10 min Spin Dry Timer

5. Incomplete spinning (Severe vibration or unbalance) See “When you load …” on page 9.

Rinsing
1. Set the DRAIN SELECTOR KNOB to ‘WASH’
2. Supply the proper amount of water as not to overflow the top of the washing tub.
3. Set the WASH TIMER 2-3 minutes.

4. Drain the water. Set the DRAIN SELECTOR KNOB to ‘DRAIN’.

5. Repeat this cycle until the drain water is clean. (2-3 cycles)
6. Be sure to lay the drain hose down.

Overflow rinse
1. Keep supplying water.
   - Adjust the water pressure to ensure that the amount of water supplied does not exceed that water drained.

2. Set the WASH TIMER 6-8 minutes.

3. As soon as the WASH TIMER shuts off, turn on the water tap
4. Set the DRAIN SELECTOR KNOB to DRAIN.

![Diagram of DRAIN SELECTOR KNOB]

**Additional rinse**

After rinsing you can select this course for a more effective rinse (Don’t select only this course for rinse.)

1. Load the laundry evenly into the spin basket.

![Diagram of laundry basket]

2. Set the LEVER WATER SELECTOR to SPIN(a) and DRAIN SELECTOR KNOB to ‘DRAIN(b)’

![Diagram of water selector and drain selector]

3. Supply water for about 1 minute. Adjust the water flow to prevent overflow from the washtub.

![Diagram of 1 minute supply]

4. After stopping the water supply, cover the laundry with a safety cover and close the inner lid.

![Diagram of inner lid and safety cover]

5. Close the spin dryer lid.

![Diagram of spin dryer lid]

6. Set the SPIN DRY TIMER 2-3 minutes.

![Diagram of spin timer]

**Laundry guide**

**Washing time**

<table>

<tr>
<td>Thick (cotton)</td>
<td>10 min. (Air Turbo)</td>
</tr>
</tbody>
</table>

**maintenance**

WHEN YOU LOAD THE LAUNDRY INTO THE SPIN BASKET. Press the laundry evenly and put the safety cover into the spin basket drum as shown in the figure.

![Bottom of balancer](image)

**troubleshooting**

**TROUBLE**

- The washing machine does not work.
- Clothes do not move freely.
- Incomplete spinning.
  (Severe vibration or unbalance.)
- Water does not drain.
- The spin dryer basket does not run.
- The water drains out immediately.

**CHECKPOINT**

- Check that the power cord is connected to a power outlet well. Power stoppage?
- Is the laundry overloaded?
- Are the laundry arranged evenly?
- Be sure to lay the drain hose down. t See page a
- Is the spin dryer lid closed completely?
- Are laundry (socks, etc.) falling out of the spin dryer basket and clinging to the axle?
- t See To pick out the clothing.: on-page a
- Is the Drain Selector set to drain?
- Is the drain hose clogged with scrap?
- t Hang up drain hose over the drain hose hook. Half fill the washtub with the water and try to drain it again. (Scrub will be removed by water drain pressure.)

- Although the machine may stay still, a maximum of 5 minutes. If the WASH TIMER indicates in excess of 15 minutes. It is just in the process of soaking and not a breakdown.
- Check the knob position. It should not be in the 'No Work' zone.

- Check the knob position.

- It should not be in the 'No Work' zone.

- The energy label specifications have been determined by using the following program according to IEC 60456. This Program is “(For 9.5 kg – VVT95A4200LL / VVT95A4200RR Delicate Programme)”
  For 9.5 Kg: Program is Wash 15min -> Rinse 10min -> Spin 5min -> Spin 5min. (Wash selector: Delicate, Water level: Maximum, Spin weight: Half+Half

Terms of Warranty

Warranty not applicable in any of the following cases

1. The Complete warranty Card is not presented to the service engineer at the time of repairs being undertaken/requested.
2. The Product is not purchased from an Authorized Samsung Sales Dealer.
3. The Product purchased is not used according to the instruction given in the INSTRUCTION MANUAL as determined by company personnel.
4. Detect Caused by improper use. as determined by the authorized service centers/ Company Personnel.
5. Modification or alterations of any nature made in the circuitry by the Purchaser or unauthorized Personnel. as determined by Company personnel.
6. The Warranty is not applicable if the washing machine used for commercial purposes or in Public places like Hotels. training centers and other similar applications.
7. The Original Serial number is removed. obliterated or altered from the Product.
8. Detect due to causes beyond control like lightning. abnormal voltage acts of god or while in transit to a service center or to the purchaser resides.
9. Correcting the installation for example leveling the product. adjustment of the drain hose. Adjustment of Tap adopter.
10. Noise or Vibration that is considered as normal for example water drain sound. spin sound or warning beeps.
11. Removal of foreign objects/substances from machines. including the Drain Valve and inlet hose filter for example coin. Grit. safety pin. buttons. hooks. Dirt accumulation etc.
12. Replace fuse. correcting house wiring. house plumbing and defect or damage caused by household pets, rats, cockroaches, or any other animals or insects. For warranty, conditions refer to the warranty card.
