Please make sure the battery is charged before using it for the first time

1. Connect the mouse with the included charging cable.
2. When the count switch(charging)LED light goes off, charging is complete.

Please disconnect the charging cable

Be sure to use the included charging cable for charging

Charging time is about 3 hours

Connection with Mouse

«How to connect to Bluetooth devices»

Switch on the mouse, press the pairing/ connection button to switch to

1. Bluetooth mode, and the [g channel BT LED blinks slowly.
2. Press and hold the pairing / connection button for more than seconds to make the [g channel BT LED flash quickly and enter Bluetooth pairing mode. When the following model name is displayed on the device side, the pairing has been successfully completed with operation method on the device side. Device name "SANWA DBT9-10"

After Pairing Operation is complete, when the power switch on the mouse is turned on, it will be connected to the device automatically.

<How to connect to 24GHz wireless devices>

Note It is recommended to close all other applications before connecting the mouse. Switch on the mouse, press the pairing/connection button to switch to 24GHz wireless (US8 A) mode or 2.4GHz wireless (Type-C mode). [The channel A LED blinks slowly. the mouse enters 24GHz wireless (US8 A) mode, [The channel C LED blinks slowly. the mouse enters 24GHz wireless (Type-C mode). 2. Power on the computer and start the operating system. 3. Open the receiver storage slot, remove the corresponding receiver and then insert the receiver into the corresponding port of the device. 4. Hardware detection starts automatically, and a wizard for updating the device driver will start up. (Installation is completed automatically in Mac environment)

Multi -pairing Setting Method

Multi-device pairing can support 3 devices (1 Bluetooth device, 1 device connected in 24GHz wireless (US8 A) mode, and 1 device connected in 24GHz wireless (Type-C) mode) and switch the connection. 1. Switch on the mouse, the current mode LED light will blink slowly 6-7 times.

2. See step 8 "Connection with Mouse" to complete the connection pairing of related devices respectively, each channel corresponds to one device. 3. Press the pairing/ connection button to switch to the appropriate channel to select the device.

Customize Buttons (Windows only)

Once you download the driver software from the website, you can use the button programming function.

To use custom keystrokes, you need to keep the software enabled. <https://www.samwa.com/download/mup.pdf>

1. Please access. The download will start as soon as you access it.
2. Save and open the file.
3. Please follow the installation wizard to install the driver.

In the process of installation or use of any problem, please contact. You can also refer to this document.

Troubleshooting

The mouse (mouse cursor) doesn't move

1. Check to make sure the pairing has been severed. (see Step 9)
2. Make sure that the mouse's power has not been switched to OFF.
3. The battery may be low, please try to charge it.

If the mouse is not moved for some time, it takes a few moments to start up. The mouse (mouse cursor) doesn't move.

If the product is not moved for some time, it enters deep mode to conserve the battery. Pressing the button on the mouse will restore movement, but it will take a few seconds.
