DISTRIBUTION BOX MODULE

MZ–3 S is an universal distribution box module designed for low–voltage electrical installations, including security alarm systems.

Its purpose is to connect several wires without having to solder them or use any additional terminal blocks or other connections, which greatly facilitates the installation

work. For easy identification, the connections are numbered.

MZ–3 S is provided with 38 screw–type terminal blocks having maximum operating voltage 24 V AC/DC and current up to 500 mA.

Metal pins are attached to each terminal to enable selected connections to be connected in series using jumpers. Additionally, the module is provided with a tamper switch that responds to opening the enclosure.

The MZ–3 module with screw–type terminals comes in two versions, which differ by the size of their terminal blocks: MZ–3 L (large blocks) and MZ–3 S (small blocks).

The module is available in an aesthetic enclosure made of white plastic.

- facilitates installation of low–voltage installations, like alarm installations
- screw type terminals

TECHNICAL DATA

Number of terminals	38
Max. terminal voltage	24 V DC/AC
Max. jumper current	500 mA
Tamper contact	Yes
Enclosure dimensions	132 x 89 x 30 mm
Terminals dimensions	1,5 x 2,5 mm
Weight	151 g

The actual appearance of the products may differ from the presented images. Product descriptions are provided in the web service for information purposes only.
