Operating instructions

- **Special note:** if you use the headset for the first time or use it again after 1 hour, you need to take out the headset and put it back. The charging warehouse wakes up the earphone, realizing the function of earphone automatically starting; The earphones are ready by the time they leave the factory. Ear matching. If the left and right ears cannot form a team, please follow the following steps:
- **Steps:** turn on both earphones at the same time. The red and blue lights flicker alternately for about 5 seconds. Move the left and right earphones to connect, TWS team successfully. When the time to play the mobile phone bluetooth can be paired to a search connection, after the successful pairing of the headset, the project will not flash mode.
- **Operation steps for the use of one earphone:** take out any earphone from the charging warehouse and turn it on. The red and blue lights will flicker alternately. At this time, turn on the phone's bluetooth to pair the search connection.
- **Call voice assistant:** after the headset is connected to the standby process, long press for 2 seconds to release the hand to wake up the voice assistant (SURI) function;
- **Master-slave switching operation:** after the TWS is connected, it can be used independently regardless of the main and secondary connections (if one headset is without electricity or charging state, the normal use of the other headset will not be affected), and the two headphones can be used as the main sound channel alternately.
- **Bluetooth reconnects operation:** if the bluetooth and the phone have been paired successfully and the phone has not deleted the address code information (pairing name), the headset can be automatically reconnected by restarting the headset (or after the headset is plugged into the charging bin, it will automatically reconnect by unplugging the headset). earpiece

Notes:

1. Please do not drop, hit, scratch, twist, hit, crush or throw the bluetooth headset into the water.
2. When using a bluetooth headset, keep it away from the magnets, appliances, and speakers;
3. Try to avoid placing the bluetooth headset at the extreme temperature (use the ambient operating temperature range of -10°C-45°C).
4. Avoid exposing the bluetooth headset to a damp environment;
5. If you have not used the bluetooth headset for a long time, please charge it fully and charge it every other week to extend the service life of the headset;

6. Do not let the bluetooth headset near the fire source;
7. Please do not put the bluetooth headset and charging bin beside inflammable and explosive articles;
