#### Introduction

HE03 is an HDMI extender that can use a cost-effective Ethernet cable to send HDMI signal for up to 150M with a resolution up to 1080p@60Hz. Its TX unit has a loop out port that can connect an extra HDMI display. The extender applies AV over IP technology, which can work with Ethernet switches to split an HDMI signal into multiple ones.

#### **Features**

- Resolution up to 1080p@60Hz.
- Signal extension up to 150M over CAT5e (or greater) cable.
- Built-in local loop-out port for an extra HDMI display at TX side.
- Workable with Ethernet switches for point-to-many HDMI transmission.
- Workable with SR01X (IP repeater) for long distances.

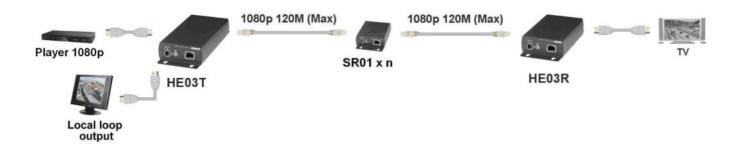

#### Installation view

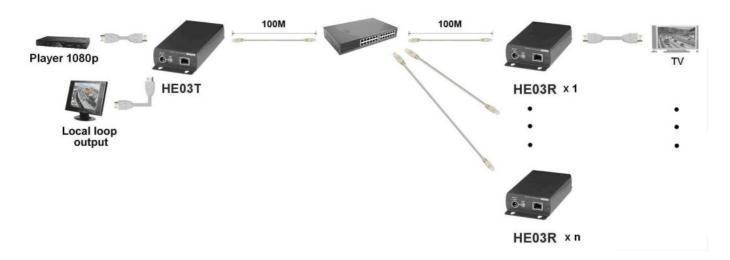

**Optional Model: SR01 Signal Repeater (order separately)** 

- Extend data signal for an additional 120meters.
- Application for HE03T signals for extra-long range transmission.
- Ability to cascade connection with multiple SR01 for long-range transmission
- · Built-in LED status indication.
- External power required.
- · Plug and play for easy installation.

#### Work with HE03 CAT5e Extender

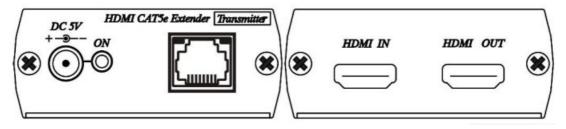

## Economic HDMI over IP Extender, support point to many connections via a network switch

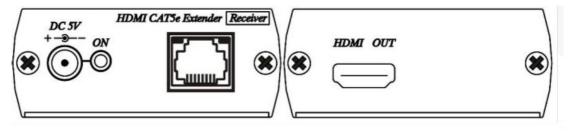

#### **Panel View**

## 1. Transmitter

#### 2. Receiver

## **LED Indication Status**

Green LED: ON Power on

RJ45 LED: Orange Flash (Data transmission)

Green on (linking)

#### Cable

Link Cable use high quality Cat.5e UTP/STP/FTP or Cat.6 UTP cable

#### **RJ45 Define**

Link Cable (TIA/EIA-568-B)

1. Orange-white	Data 1 +	
2. Orange	Data 1 –	
3. Green-white	Data 2 +	
4. Blue	Data 3 +	
5. Blue-white	Data 3 –	
6. Green	Data 2 –	
7. Brown-white	Data 4 +	
8. Brown	Data 4 –	

## **Computer IP Address Setting**

System default IP address is 192.168.168.55 for HE03T, 192.168.168.56 for HE03R (subnet mask 255.255.255.0), Your computer must set in same subnet mask to enter the web setup page.

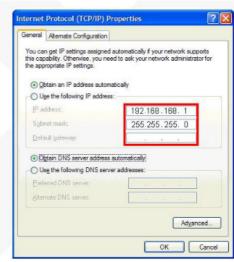

To change the IP address of computer please follow below step: (based on Windows XP):

Right click on "My Network Place"  $\rightarrow$  "Properties" then right click on "Local Area Connection"  $\rightarrow$  "Properties" then double click on "Internet Protocol (TCP/IP)" to setting as below:

(IP address 192.168.168.1, sub mask 255.255.255.0)

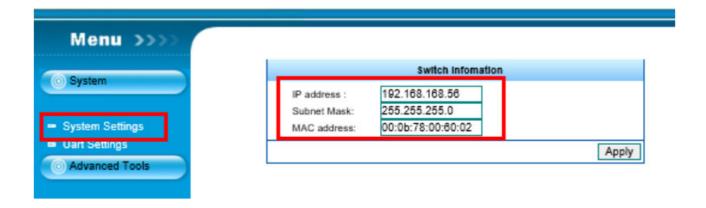

## Login in to the web

Use CAT5e cable to connect transmitter/receiver RJ45 port to PC LAN port, enter the IP address of TX/RX in the web browser.

After login to the web, click System Settings you can change IP address, Subnet Mask, MAC address at System page, then click Apply to finish setting.

## **Specification**

ITEM NO.	HE03T	HE03R	
Support			
Compliance	HDMI 1.3b, HDCP		
Max. Video Resolution	1080p@60Hz		
Max. Transmission Distance	150M over CAT5e, 160M over CAT6 cable		
Ports & Interfaces			
Video Input	1 x HDMI Type A	1 x RJ45	
Video Output	1 x RJ45	1 x HDMI Type A	
Video Loop-out	1 x HDMI Type A		
Power			
Power Supply	DC 5V 2A	DC 5V 2A	
Power Consumption	1200mA	700mA	
Ambient Temperature			
Operation	-20 to 60°C		
Storage	-20 to 85°C		
Humidity	up to 95%		
Physical Characteristics			
Dimensions	67 x 170 x 27mm	67 x 130 x 27mm	

## RoHS (€
