Only for EU Countries

Do not dispose of electric tools together with household waste material! In observance of European directive 2012/19/EU on wasted electrical and electronic equipment and its implementation in accordance with national law, electric tools that have reached the end of their life must be collected separately and returned to an

environmentally compatible recycling facility.

Product Overview

Content is Locked

Please complete the order process.
You will then have access to the entire document.

Why is the document locked? We definitely don't want to make you angry. There are two main reasons for this:

- 1. Creating and maintaining a comprehensive tutorial database costs not only a lot of effort and time, but also financial resources. Would you do it for free? No*. By purchasing this service, you will receive full instructions and support the operation of a development of our site. Maybe it will come in handy sometime.
*) Maybe at first yes. But know that it cannot be subsidized in the long term. And we certainly won't get rich from it.
- 2. Then there are the "robots" who feed on our work and "suck" the results of our efforts for their benefit. With this step, we are trying to prevent them.

And if you're not interested, we respect that. Urge your dealer. And if you fail, we'd love to see you!
