SCSETC S8 Bluetooth Helmet Intercom

FAQs

- **Q: How do I know if my device is in low-power mode?**
  - **A:** When the battery power is below 3.4V, a low-power alarm will sound every 3 minutes, and the red light will flash.
- **Q: How do I pair my device with another Bluetooth device?**
  - **A:** Ensure your device is in pairing mode by following the instructions provided. Once in pairing mode, you can pair it with another Bluetooth device by initiating pairing on both devices simultaneously.

OVERVIEW

1. Power On/Off key (turn on/off the power supply)
2. Multifunctional key
3. Charging inlet
4. Indicator light

PRODUCT FUNCTION

- S8 is a helmet-based Bluetooth intercom with stable performance. The maximum call distance is 1200m, and the inter-talk distance in the outdoor environment is generally 500m to 1200m.
- In addition, as a high-performance Bluetooth earphone (with a range of 50m), it has functions, such as automatic call answer, waterproofing, and high-resolution voice. It is designed for the riding motorcycles, to ensure the riding safety.
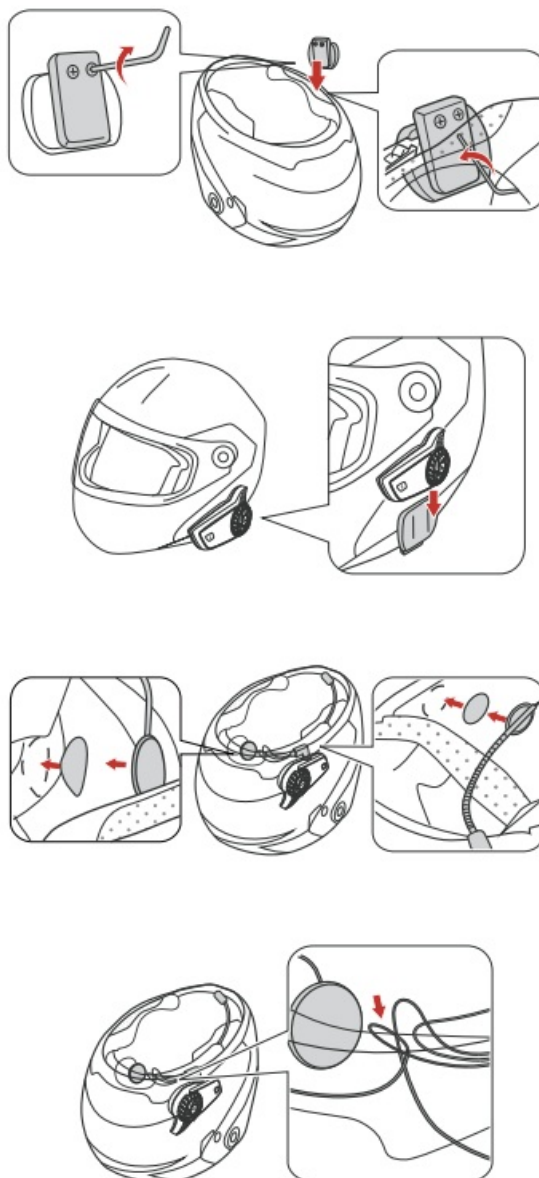

Product characteristics

- It supports the inner talk of two persons
- It supports the play of MP3/navigation FM
- DSP noise-reduction technology
- Second-generation full-range high-quality HD horn
- It allows for the simultaneous connection of two Bluetooth devices
- Intimate voice prompt
- Waterproofing and dust proofing
- level up to IP X6
- General-purpose full helmet-type
- High endurance of battery
- Voice dial/Redial of the last number

Remarks

1. Automatic shutdown 25 minutes in case of no connection (except FM mode)
2. Function priority: Call > Talk > GPS&FM& Music

Installation steps

1. Fix it on the helmet
2. Install the intercom on the seat
3. Attach it on the helmet with magic tape, and choose the hard/soft microphone as required
4. Sort the disorderly cables inside, and place them in the foam of the helmet, to wear

- When battery power is below 3.4V, the voice prompt displays "insufficient battery power" (red light flashes two times every 3 minutes)

Charging

- During the charging, the red light is ON, and when it is fully charged, the red light is OFF

Product specification

- **Bluetooth version:** V5.1

- **Mode protocol:** HF/HS, A2DP, AVRCP
- **Battery type:** Lithium battery
- **Battery capacity:** 1000mah
- **Temperature range:** -10~60°C
- **Charging time:** about 3 hours (TYPE-C)
- **Charging voltage:** 5V
- **Charging current:** 500mah
- **Power supply voltage:** VDD3.7V
- **Standby time:** 500 hours
- **Working time:** 12 hours
- **Frequency range:** 2.402GHZ-2.480GHZ
- **Wireless transmission range of intercom:** 1200Mu

FCC

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, under part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used per the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. this device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.
