## Certification and Safety Approvals FCC Compliance Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antennae
- Increase the separation between the equipment and the receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. –
- Consult the dealer or an experienced radio/TV technician for help.

**FCC RF Exposure Statement**
This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. When equipped, the distance between antenna and one's head surface is 21.5mm.

**FCC Caution**
Any changes or modifications to the equipment not expressly approved by the party responsible for compliance could void user's authority to operate the equipment.

**Industry Canada(IC) Statement**
This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

1. this device may not cause interference, and

2. this device must accept any interference, including interference that may cause undesired operation of the device.

## FAQ

### How do I reset the device to factory settings?
To perform a factory reset:

1. Access the Configuration Menu by long-pressing the Power Button.
2. Select 'Factory Reset' option.
3. The device will automatically restore default settings and turn off.

### What should I do if I encounter Bluetooth connectivity issues?
If Bluetooth connectivity problems, try the following steps:

- Ensure the device is in pairing mode.
- Check if other Bluetooth devices are causing interference.
- Restart both the headset and your mobile phone.
- If issues persist, contact customer support for further assistance.
