HOW TO PAIR

Normally keyboard and mouse have already been paired before delivery. Please follow the below steps in case they are disconnected.

Keyboard Paring: Switch your keyboard off first. pluck the USB receiver out. and then turn your keyboard on and quickly press "Esc' + "k" or "Esc" + "q". Plug the USB receiver into your computer when the indicator starts flashing Reconnection is done when the indicator light turns off (Please place keyboard close to USB receiver when paring).

Mouse Paring: Switch your mouse off first. pluck the USB receiver out. and then replug it into your computer. Press and hold "Right Click" first and then keep pressing "Scroll Wheel". and switch the mouse on. Reconnection is done after 3-5 seconds.

SETTING UP YOUR WIRELESS KEYBOARD AND MOUSE

1. Install two AM batteries in your keyboard and two MA batteries in your mouse (**Note:** batteries+/-ends should follow those indicated on the battery compartment label).

2. Connect the 2.4 GHz USB receiver to the computer (Please note that this combo only needs one USB receiver for both keyboard and mouse, and the USB receiver is inserted inside the keyboard, not inside the mouse). Warning: plug the USB receiver into the USB 2.0 port (usually the black one) not the USB 3.0 the blue one; this is due to USB 3.0 radio frequency interfering with the 2.4GHz wireless device, and not properly plug-in may lead to mouse lagging or freezing problems. Sometimes the black one can also be USB 3.0

3. Flip the power switches on (Note: keyboard and mouse has their own independent POWER ON/OFF switch, located on their back. Flipping them off for energy saving when not in use. The keyboard and mouse have already been successfully paired before delivery and thus simply plug and play).

INDICATOR LIGHTS

Low Power Alarm:

Flashing red 3 times per second.

Indicate Whether Caps Lock Is On or Off:

CPS Press Caps Lock once to type all letters as uppercase. Press Caps Lock again to turn it off.

Indicate Whether Num Lock Is On or Off:
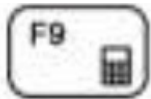

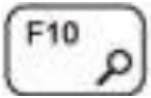

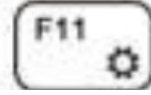

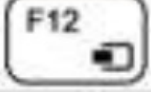

NuM To use the numeric keypad to enter numbers, press Num Lock. When Num Lock is off, the numeric functions as a second set of navigation keys.
