SHAD E091CL Click System Tank Bag

Specifications

- Product Name: Click System Tank Bag
- Model Number: E091CL
- Weight: 2 kg
- Lock Type: Combination lock

Product Usage Instructions

1. Mounting and Installation:

Before mounting the Click System Tank Bag, it is crucial to carefully read through the instructions from start to finish. Failure to follow the recommended mounting and installation instructions will void the warranty. The manufacturer is not liable for any damage, injury, or death resulting from improper use and installation of the product.

2. Inspection and Maintenance:

Regularly inspect the knobs, bolts, screws, straps, and locks for signs of wear, corrosion, and fatigue. Never drive with any lock, knob, or rack in an open or unlocked position. Ensure that all components are in good working condition before each use.

3. Theft Prevention:

The Shad locks included with the product are designed to deter vandalism and theft. However, they should not be considered theft-proof. It is recommended to remove valuable gear from the tank bag if your vehicle will be unattended for an extended period.

4. Compliance with Laws:

Check the specific laws in your country regarding transportation systems and the projection of objects beyond the perimeter of a vehicle. Be aware of the width and height of your cargo, as it will affect the vehicle's driving behaviour.

5. Speed and Caution:

For the safety of your vehicle and luggage system, obey all posted speed limits and traffic cautions. Adjust your

speed according to road conditions and the load being carried.

6. Consultation with Shad Dealer:

If you have any questions regarding the operations and limits of Shad Products, it is recommended to consult with your Shad dealer for expert advice.

7. Intended Use:

Do not use Shad carriers and accessories for purposes other than those for which they were designed. Ensure that the product is used within its intended capacity. Failure to follow these guidelines or the product's instructions will void the warranty.

8. Protection from Elements:

Prolonged exposure to the elements may cause discolouration of fabrics and wear away plastic components. It is advisable to store the tank bag in a dry and protected area when not in use.

9. Load Distribution:

When packing the tank bag, make sure that the loads are evenly distributed inside the cargo box or bag. This will help maintain stability and balance during travel.

10. Waterproof Features:

While the tank bag may have waterproof zippers and rain covers, it does not guarantee that the bag is completely waterproof. Take necessary precautions to protect your belongings from water damage.

FAQ (Frequently Asked Questions):

Are the Click System Fitting Kit and Bike Compatibility sold separately?

Yes, the Click System Fitting Kit is sold separately from the Click System Tank Bag. Additionally, bike compatibility information can be checked on the shad.es website.

How do I set my combination for the lock?

To set your combination for the lock, follow these steps:

1. Put the dials at the original number (0-0-0).
2. Press down the reset button (a) with a tool until you hear a click sound.
3. Set your desired combination by turning the dials (b), for example, 8-8-8.
4. Push the button (c) towards the direction of the arrow, and the reset button (a) will return when you hear another click sound. Now, your combination is set. Please remember it by heart.

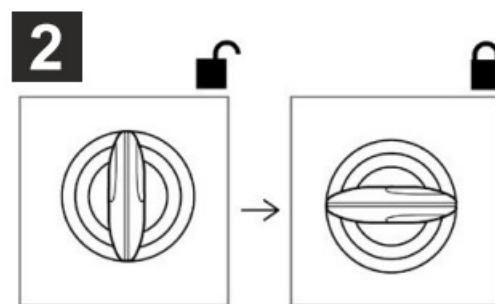

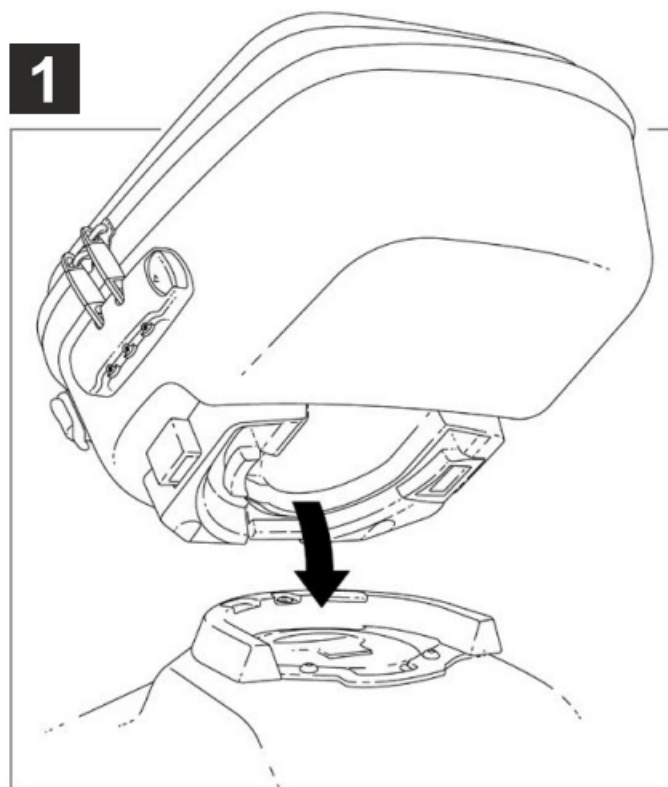

Care and Maintenance

Warning
