**SHAREVISION RC22 Carplay Wireless Adapter**

## Product Information

### Specifications:

- Dimensions: 55x77mm
- Compatibility: iPhone 6 and above, iOS 10 and above
- Functionality: Converts wired Carplay to wireless Carplay

## Product Usage Instructions

### Product Operation Instructions:

1. Connect the product with the multimedia data port of the car using the provided data cable.
2. Turn on your iPhone's Wi-Fi, Bluetooth, and Carplay function.
3. Enable Bluetooth on your iPhone and search for the Bluetooth display name "smartbox – \*\*\*", click on it to pair and connect successfully.
4. After successful pairing, you can start using wireless Carplay for a more enjoyable driving experience.
5. Once the adapter is connected to the in-vehicle device for the first time, it will automatically reconnect in the future.

### Product Update System:

1. Turn on Wi-Fi on your iPhone and connect to the corresponding display name using password 88888888.
2. Enter IP address 192.168.1.101 in Safari browser, click on "meto upgrade" and wait for the upgrade process to complete.
3. After the upgrade, unplug and plug the adapter again, ignore previous Bluetooth connections, and reconnect for use.

### Notes:

1. Ensure your iPhone model is iPhone 6 or above with iOS 10 or above.
2. Make sure your car has the factory wired Carplay; check compatibility on Apple's website.
3. The product supports both Carplay and Auto functions based on multimedia system settings.

## Frequently Asked Questions

### Frequently Asked Questions:

1. **Q: Why doesn't the indicator light of the product turn off automatically when the car is turned off?**

A: This product does not have a battery; the indicator light behavior is determined by the car's Multimedia USB data port.

2. **Q: Why can't I always connect?**

A: Make sure to turn on Wi-Fi, Bluetooth, and Carplay switches simultaneously for successful connections.

## For Carplay Wireless Adapter

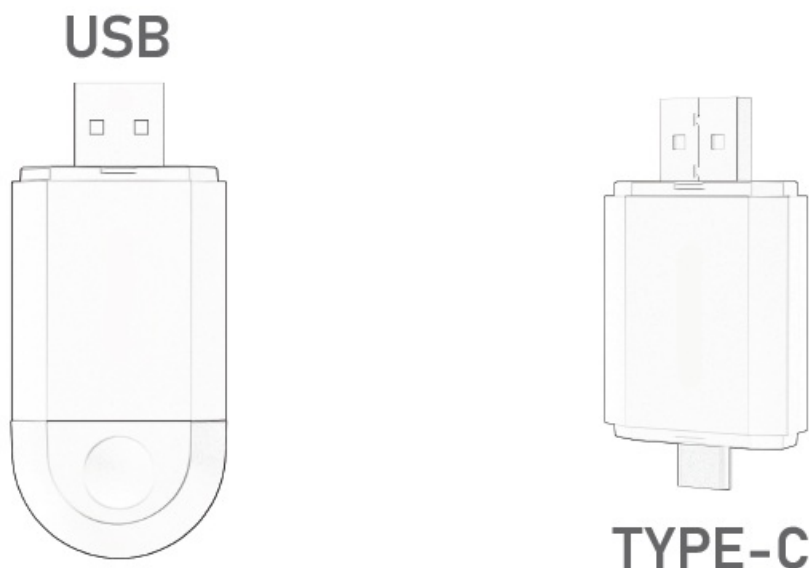

Thank you for purchasing our product. For optimal performance and safety, please read these instructions carefully before operating your product.

### Summary

The wireless carplay adapter converts wired carplay to wireless carplay, realizing the interconnection between iPhone and car. You can easily enjoy music, navigation and other functions wirelessly, plug and play, and keep the original car operation. This interconnection provides drivers with more driving pleasure and reduces the frequency of iPhone use.

We are committed to providing our customers with a safer driving experience.

## Product Accessories

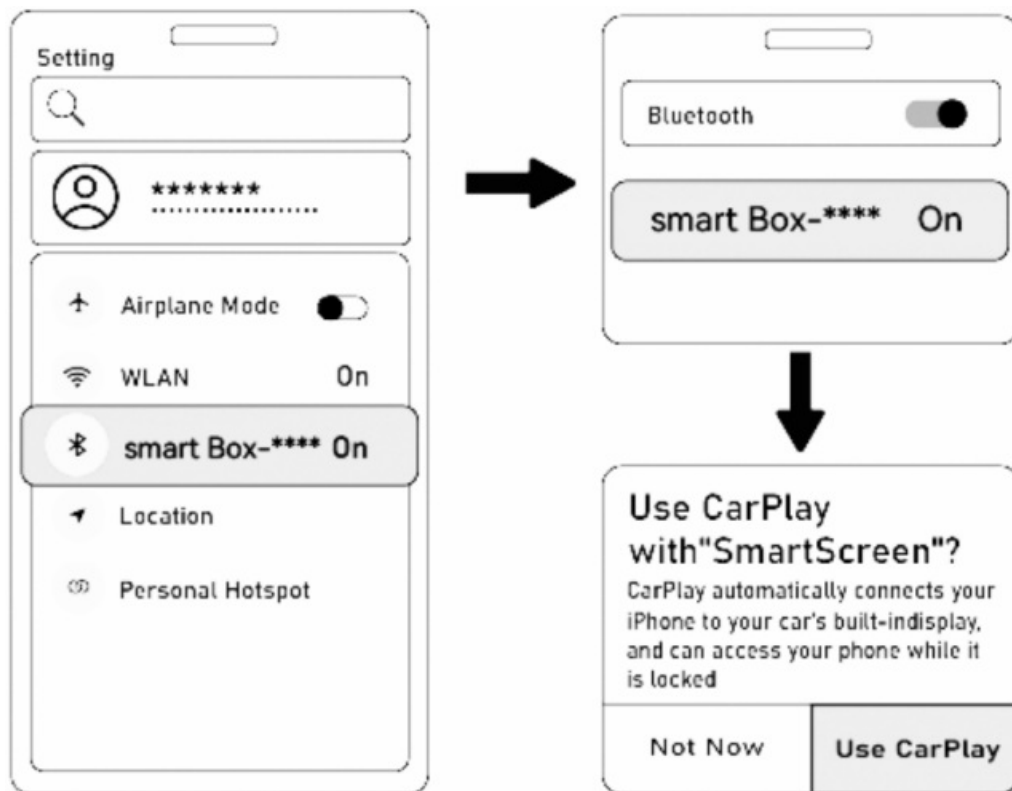

(Pictures are for reference only, subject to the real thing)

## Frequently Asked Questions

- **Why doesn't the indicator light of the product turn off automatically when the car is turned off?**

A: This product does not have a battery, the exact time the lights go out is determined by the Multimedia USB data port, the lights out time is different for each car.

- **Why can't I always connect?**

A:

- Turn on the WIFI, Bluetooth and Carplay switches at the same time.
- The car multimedia must support wired Carplay function;
- Whether the product indicator light is on;
- Whether the product is connected to the multimedia data interface.

- **Can the product be paired with more than one iPhone?**

A: Yes, if you want to change the iPhone, you need to turn off the Bluetooth and WIFI function switch of the used iPhone.

- **Can't it reconnect automatically?**

A: The product can only connect to the last paired device, and you can't turn off the WIFI and Bluetooth switch.

- **No sound when you call?**

A: You can select the sound output mode as Carplay mode in the iPhone call page, some cars need to set it manually.

- **Sound delay, navigation delay?**

A: Playing music and navigation use iPhone traffic, if the iPhone signal is not stable, the above problems will occur.

- **Why is the connection suddenly disconnected?**

A: The product data line has a limiting function, the disconnection is caused by the loosening of the car data port and the data line.

- **Why can't Carplay start or the device is incompatible/unrecognized USB?**

A:

- Re-unplug the device and restart the multimedia.
- Replace the data cable.

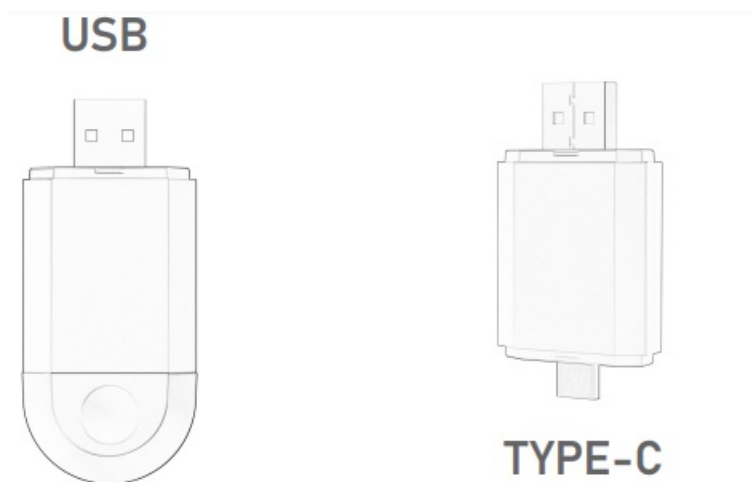

## **For Android Auto Wireless Adapter**

## FCC

This device complies with part 15 of the FCC Rules.

### Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
