## SETUP

- Before cleaning, clear cords and remove small obstacles like clothing or toys that are less than 2.8" tall.
- Open interior doors in rooms you want your robot to clean.

- Find a permanent location for the dock, as pictured above, in a central area with a strong Wi-Fi signal.
- Place the dock on the bare floor, with its back against the wall.
- Plug in the dock. The Indicator Light will illuminate green when the dock has power.

To charge,

Place the robot on the dock to charge. The dock indicator light will turn blue and the robot will beep when charging begins.

## STEPS FOR SUCCESS

Before your robot can vacuum, it must complete an Explore Run to map your home.

- This will take less time than a full vacuum run.
- After the Explore Run, there will be an interactive map of your home in the app, and your robot will be ready to clean.

After the explore run is complete, press the Clean button on the robot or in the app to send the robot on its first vacuuming run.

## LIVING WITH YOUR ROBOT

	
<p>After the Explore Run, the robot will create an interactive map in the app, where you can create rooms and no-go zones.</p>	<p>Your robot can easily climb over a no-go zone in the app to block off an area.</p>

	
<p>While your robot is cleaning, do not pick it up and move it, or move the charging dock—this will impact the robot's ability to map your home.</p>	<p>During the first few weeks of use, the dust bin will need to be emptied frequently to remove dust and debris from areas that were previously cleaned. Remove any debris between the filter and the plastic shield.</p>

**Questions? Two Easy Steps If You're Stuck:**

Have trouble connecting to your robot? Call 1-855-460-5425 for robot support. For how-to videos, FAQs, troubleshooting, and tips & tricks visit: [sharkclean.com/support](https://sharkclean.com/support)

**Smart Home Setup**

To set up voice control using Google Home or Amazon Alexa, visit [sharkclean.com/app](https://sharkclean.com/app) for instructions.
