### HELPFUL HINTS

#### Base Set-Up

- Place the base on a flat, level **hard floor surface** in a location with a strong Wi-Fi signal.
- Make sure the base has at least 2 feet of clearance in front and 1 foot on both sides.
- Plug in the base. The LED will turn green when it is powered on.

#### Robot Install

Orient the robot to align its charging contacts with the base charging contacts. The base LED will be solid blue when the robot is charging.

#### Auto Evacuation

After 10-15 seconds on the base, your robot will begin to evacuate into the base. This is normal for your self-empty base.

#### Wi-Fi Connection

Hold down the **DOCK** button on the robot for 5-7 seconds to activate pairing mode.
