NOTES:

- This document is intended to be used as a reference guide to supply useful information for a design or installation. It is not intended to be a step-by-step procedure for installation.
- Any ceilings or walls must be strong enough to support the monitor and the installation must follow any local building codes. All mounts should make secure contact with wood studs.
- Distances are in inches, for millimeters multiplied by 25.4. Distances may vary $\pm 5\%$.

Rotation:

- If the display is to be used in portrait orientation, rotation needs to be counterclockwise.

Ventilation Recommendations:

Dimensions below are the minimum recommended for proper ventilation.

NOTE:

- The above are recommendations to keep your display as cool as possible. If the distances are less than 100mm, extra ventilation may be necessary. The ventilation space should not be covered or closed off at the front of the opening. If for some reason the opening needs to be covered, other means of ventilation will need to be incorporated into the design. Contact NEC for design review and recommendations.

Intel® Smart Display Module Integration:

1. Place the monitor face down on a flat even surface that is larger than the monitor screen. Use a sturdy table that can easily support the weight of the monitor. To avoid scratching the LCD panel, always place a soft cloth, such as a blanket that is larger than the monitor's screen area, on the table before laying the monitor face down. Make sure there is nothing on the table that can damage the monitor.
2. Remove the SLOT COVER and the OPTION COVER. Note when using the Intel® SDM-L type option board, slide the CENTER RAIL to the right and remove it. Reverse the process to re-attach
3. Gently push in the SDM-S or SDM-L module
4. Attach included Option Cover after installation of SDM device.

Compute Module Integration:

- Please see separate DS1-IF20CE installation guide for full integration. Image below may not represent actual back of unit but the concept is the same.
- Removing the OPTION COVER is necessary for installation
