PRODUCT INSTRUCTIONS

POWER SUPPLY

- Insert the AC adaptor into a 120V AC – 60Hz mains outlet and the other end of the cord into the DC 5V Jack on the back of the unit.

TIME SETUP

- Press and hold the TIME button for 2 seconds to activate the time setting, and HOUR will flash.
- Press the "-" or"+" buttons to the correct HOUR, and the PM indicator will light when the HOUR is advanced into PM time.
- Press the TIME button to confirm HOUR, MINUTES will begin to flash.
- Press the "-" or"+" buttons to the correct MINUTE.
- Press the TIME button to confirm and save time setting. The display will stop flashing.
- **NOTE:** To switch between a 12 or 24-hour TIME display press the TIME button after the time setup is complete, the default is 12-hour standard.

DUAL ALARM SETUP

- Press and hold the ALARM 1 or 2 button for 2 seconds to activate the ALARM 1 or 2 sets, HOUR & 🔔 or 🔔 will flash.
- Press the – or + buttons to the correct HOUR, and the PM indicator will light when the HOUR is advanced into PM time.
- Press the ALARM 1 or 2 button to confirm HOUR, MINUTES will begin to flash.
- Press the- or + buttons to the correct MINUTE.
- Press the ALARM 1 or 2 button to confirm the time.

- Select BEEP or SOUND using the – or + buttons and press the ALARM 1 or 2 buttons to confirm the alarm type. The display will stop flashing.
- NOTE: If SOUND is confirmed the last played sound and max volume will be used for the alarm.

USING THE DUAL ALARM

- Press the ALARM 1 or 2 button to activate ALARM 1 or 2 and the ' or indicator will appear.
- Press the ALARM 1 or 2 button again to deactivate ALARM 1 or 2 and the ' or indicator will disappear.

NOTE: The default is OFF setting. When the alarm sounds, it will continue for 1 minute. Then the alarm will switch off automatically to conserve power if battery backup is use.

12 OR 24-HOUR DISPLAY

- In time mode, press the TIME button to select 12 or 24-HOUR TIME mode.
- **NOTE:** The default is the 12-hour display mode.

NOTE: When sleep time is done being adjusted it will jump back to the time after 5 seconds.

USING THE PROJECTOR FEATURE

- While the projector is OFF, press the PROJECTOR button to activate the projection time for 5 seconds. This offers a quick glance at the time on the ceiling; the room must be dark to see the projected image.
- Press and hold the PROJECTOR button for 2 seconds to switch on this function continuously.
- Press and hold the PROJECTOR button again for 2 seconds to switch off.

NOTE: The default is OFF setting.

BATTERY BACKUP

- Remove the BATTERY door and insert 2 new "AAA" batteries (not included) in the direction of the polarity symbols. Please make sure the batteries are new and inserted correctly.
- Backup battery power only supports the storing of TIME, ALARM 1, ALARM 2, and PROJECTION (5 seconds).
- If there is no battery and the power is interrupted, the display will show 12:00 and the ALARM / TIME will need to be reset.

NOTE: The display will not be lit under battery backup. However, the alarm will continue to function at its set time.

BATTERY WARNING

- Clean the battery contacts and also those of the device prior to battery installation. Follow the polarity(+) and (-) to place the battery.
- Do not mix old and new batteries.
- Do not mix Alkaline, Standard (Carbon – Zinc), or Rechargeable (Nickel – Cadmium) batteries.
- Incorrect battery placement will damage the dock movement and the battery may leak.
- Exhausted battery is to be removed from the product.
- Remove batteries from equipment that is not to be used for an extended period of time.
- Do not dispose of batteries in a fire. Batteries may explode or leak.

CARE OF YOUR CLOCK

- Replace the backup battery annually, or store the clock without a battery when not in use. A soft cloth or a paper towel may be used to clean your clock. Do not use any corrosive cleaner or chemical solutions on the clock. Keep the clock clean and dry to avoid any problems.

FCC Rules

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, inslueding interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. Changes or modifications not expressly approved by HDMX could void the user's authority to operate the equipment.
