- **Q: Do I need to wake the device every time I change the temperature units?**
  - **A**: It is recommended to wake the device before making any changes to ensure proper functionality.

**Using Shelly Smart Control to change the Display Units on a Shelly H&T Gen3 to Fahrenheit.**

## Introduction

By default, the Shelly H&T Gen 3 displays the temperature in Celsius. Use the following steps to change the displayed temperature units from Celsius (°C) to Fahrenheit (°F).

## Waking the Device

Before changing the temperature units displayed on the device, it is recommended to wake the device. To wake the device,
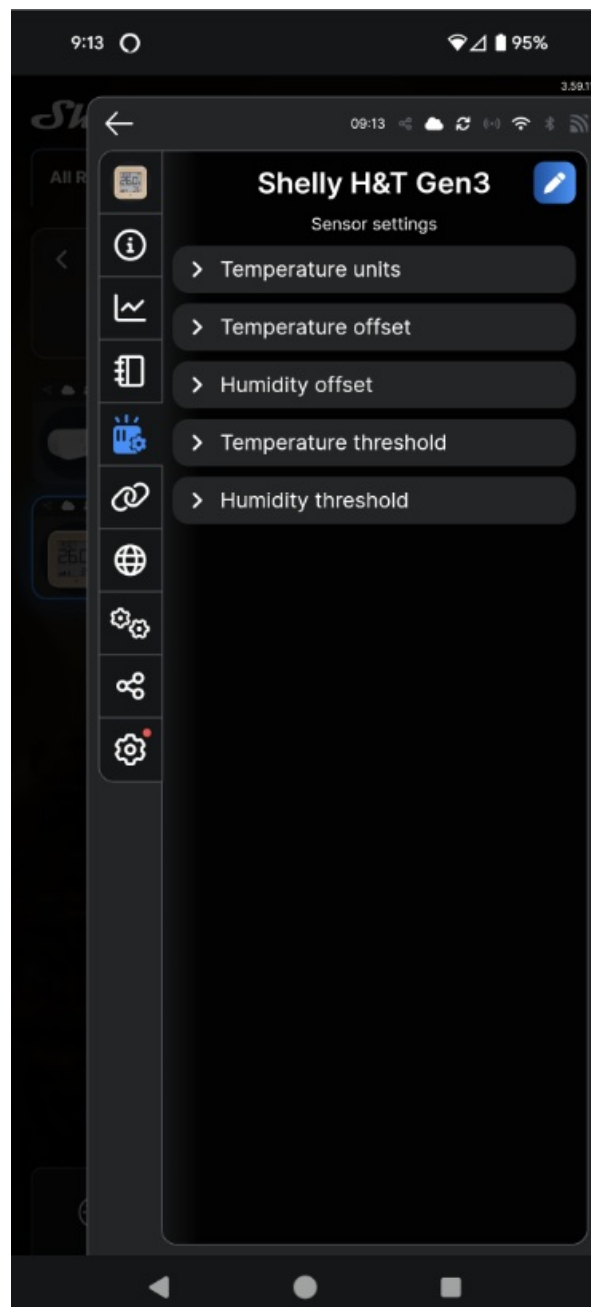

1. Open the device.

2. Press the Reset button.

**Changing the Temperature Units**

1. Open the Shelly Smart Control app.
2. Tap the Room where the H&T Gen3 is located.
3. Tap the Shelly H&T Gen3.
4. Tap the Sensor setting button represented by an icon displaying the device and a gear.

5. Tap Temperature units.
6. Tap the °F button. A message is displayed: Setting saved successfully. The device is currently sleeping. It will update once it wakes up.

7. Wake the device as explained in the previous section of this document.
8. Tap the back arrow in the Smart Control app.
9. The device displays the temperature in Fahrenheit.
