Mouse

Instruction For Charging

FAQ

What should | do if the keyboard gets delayed or stuck?

Please check there is no 2.4GHz device (e.g. router) nearby to interfere with the connection. Please check the keyboard has been fully charged. Please check there is no full metal case that may block the signal.

What should | do if the keyboard and mouse can not be charged?

Please check whether the charging port is connected. Please try to replace the charging cable. Try to change the USB port, and if the problem can not be solved, please feel free to contact us.

What should | do if the backlight stops working?

Please charge for half an hour and then re-insert the USB. Please try to restart the keyboard and mouse.

Where is my USB receiver?

The USB receiver is placed on top of the keyboard inside the package, please look for it carefully. Please contact us to get the free replacement if you have lost the USB receiver.

If the Bluetooth connection fails, what steps should I take?

Please attempt to reconnect by removing any other connected Bluetooth devices from your device. Alternatively, you can turn off the mouse, then turn it on again, and finally reopen the device to establish a connection with the mouse.

Cautions

- 1. Please fully charge the keyboard when you first receive the product as this helps to maintain the battery life.
- 2. Please remove the power supply when charging is complete.
- 3. If the keyboard is not used for a long time, it is recommended to turn off the power switch of the keyboard.
- 4. Please do not expose this product to water because it may cause short-circuit and damage the product.
- 5. Please do not drop or hit this product because shocks may damage the components inside.
- 6. Please do not place this product near the extreme heat or sources of fire

Note

The multimedia keys are for Win 8 and Win 10, for other systems, there may be no function for some combined keys.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference (2) This device must accept any interference received, including interference that may cause undesired operation.
