One Year Limited Warranty Summary

ADYSS warranted that the delivered hardware product to be free from defects in materials and workmanship for a period of one year from the original retail purchase date, and the after-sales problem can be accepted. ADYSS would guarantee neither the normal use of wear nor the damage caused by accident or abuse. Visit a retail store owned by ADYSS or ADYSS Authorized Service Providers for the service, where you can have the product repaired accordingly. Replacing your warranty rights is not included in the additional rights provided by local consumer law. When you make a claim according to this warranty policy, you may need to provide detailed information of proof of purchase.

Federal Communications Commission

FCC ID: 2ARFLBRC-1 This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
