Product Description

This product is a wireless charging transmitter for standard Qi. The maximum transmit power is 15W. Suitable for voltage input of 12-24V. Suitable for car wireless chargers. The minimum distance is 5MM.

Charging Parameters

- TYPE-C input: QC 12V
- Wired input: 12V-24V
- Wireless output power: 15W/10W/7.5W/5W
- Effective charging distance: 5MM

Safety Protection

It has safety protection functions such as overcharge, overcurrent, and FOD overtemperature.

LED light indication

blue and green lights flash alternately for 1 second and then turn off. Charging: bright blue light.

- Fully charged: Green Light.
- FOD: Greenlight flashes

Warn

1. Do not use metal or other conductors that are impermeable to electromagnetic waves.
2. Do not charge the product near or near a heat source;
3. Do not pour water or other liquids into the interface of this product, causing damage to the product; Do not allow children or animals to chew or swallow the device.
4. Do not disassemble, modify or repair the equipment.
5. Do not place magnetic stripe cards (including credit cards, phone cards, passbooks and registration cards) near the charging equipment. In order to avoid the generated magnetic field from damaging the magnetic stripe card and damaging the device.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is Subject To the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not explicitly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. During the operation of device a distance of 15 cm surrounding the device and 20 cm above the top surface of the device must be respected.
