General questions

1. Can't find the bracelet during pairing?

Please make sure that your mobile phone has turned on Bluetooth, and when the mobile phone is in the "support range" pairing, please make sure that the distance between the bracelet and the mobile phone is within 0.5 meters, and the Bluetooth communication range is within 10 meters after pairing! Please check whether the bracelet has power. If the problem persists after charging, please contact us,

2. What happens occasionally when Bluetooth fails to connect?

The Bluetooth service of some mobile phones occasionally encounters abnormality when restarting, resulting in such a situation; usually, switch the Bluetooth of the mobile phone or restart the mobile phone to establish the connection normally.

3. How to restore factory settings?

The bracelet has been connected to the phone, enter "my-band management" in the application and select "restore factory settings"

4. How to update the firmware of the bracelet?

Connect the bracelet to the mobile phone, enter "Bracelet Management" in the application and select 'Firmware Upgrade' to upgrade!

5. The sound of the hom becomes smaller after swimming and washing hands?

Because after swimming and washing hands, there are water droplets at the sound hole of the shell that will affect the sound. The sound will return to normal after shaking the water with the sound hole downward.

Precautions

1. Try to avoid external collisions during wearing.
2. Wipe with a clean soft cloth when cleaning.
3. Avoid contact with chemicals and detergents.

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
