WiFi Repeater mode

In this mode, the router boosts the existing wireless coverage in your home.

1 Connect Your Router

Plug the extender into an electrical outlet near your host router, and then wait until the LED is on and then off.

2 Configure repeater mode

Method ONE Using WPS (Wi-Fi Protected Setup)

Using WPS is an easier way to extend your host network. You are recommended to use this method if your host

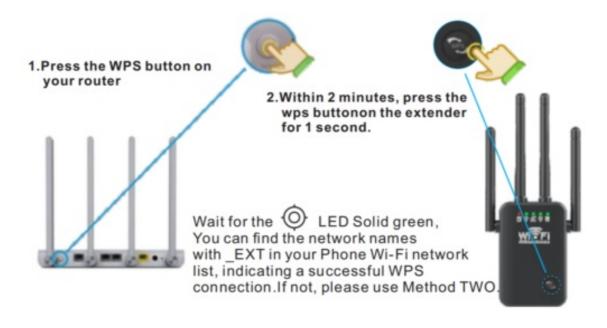

router has the WPS button. The button might look like one of these: **Method Two**

, If not, please refer to

Connect

Relocate

- 1. Plug the extender into an electrical outlet between your router (Host Network) and the Wi-Fi "dead" zone. The location you choose must be within the range of your existing host network.
- 2. Wait until the LED is lit and solid Green. If not, relocate it closer to the router to achieve a good (or better) signal quality.

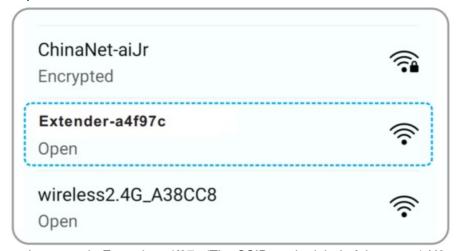

Enjoy!

Extended Network Names: Host Router, s network name with _EXT at the end Extended networks Password: Share the same passwords as those of your host networks

Method TWO

Using a Web Browser For Mobile phone users Connect to the router U9

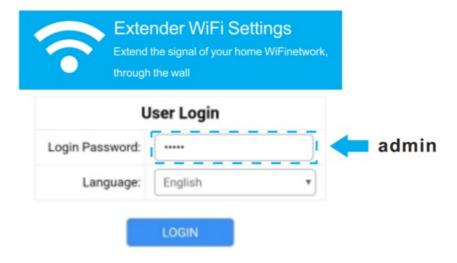

- 1. Find the SSID(Network Name) printed on the label of the router. U9
- 2. Connect your Mobile phone to the router's network U9

Connect to the extender network: Extender-a4f97c (The SSID on the label of the router) U9

3 Login

- 1. Launch a web browser and type http://192.168.11.1 in the address field.(If the phone is connected to the repeater for the first time, The phone will automatically pop up on the login page)
- 2. Use admin (all lowercase) for the password to log in.

4 Mode selection

Relocate

- 1. Plug the extender into an electrical outlet between your router (Host Network) and the Wi-Fi "dead" zone. The location you choose must be within the range of your existing host network.
- 2. Wait until the CED is lit and solid Green. If not, relocate it closer to the router to achieve a good (or better) signal quality.

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Statement

To maintain compliance with FCC's RF exposure guidelines, This equipment should be installed and operated with a minimum distance of 20cm from the radiator of your body. This device and its antenna(s) must not be colocated or operated in conjunction with any other antenna or transmitter.
