Common Problems and Solutions

Fault	Solution
No power, and the power indicator light does not light up	(1) Check if the switch is turned on. (2) Check if the battery has power.
No sound during music playback	(1) Check if the device is in the music playback mode. (2) Check if the song is in a supported format. (3) Check if the speaker is in the pause or mute state.
Bluetooth cannot be detected	(1) Check if the device is in the Bluetooth mode. (2) Check if the operation is in accordance with the Bluetooth operation instructions. (3) Check if the distance between devices is too large. (4) Check if there are too many obstacles between devices.
No sound in USB speaker mode	(1) Check if the USB data cable is properly connected.

Precautions

- Please ensure that the speaker is fully charged before use to guarantee the best user experience.
- When re-pairing with a new terminal device, make sure the Bluetooth of the original

device is turned off to avoid connection conflicts.

- When not in use for a long time, turn off the speaker and
- Unplug the charging cable to extend the battery life.
- Do not use the speaker in a humid or high-temperature environment to prevent damage to the device.
- If you encounter any problems, please contact the after-sales service promptly.
- We hope this manual can help you use the two-way Speak Better and enjoy a wonderful music experience!

FCC Warning

This equipment has been tested and found to comply with the limits for a Class B digital

device,. Under part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used according to the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by the manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 0cm between the radiator and your body.
