ShieldPro Flood Temperature Sensor

The ShieldPro Flood/Temperature sensor installs easily in areas where water damage is a risk-like under sinks or in basements.

The sensor notifies you when it detects water or extreme temperatures.

What Comes In The Box?

- Flood/Temperature sensor x 1

Flood/temperature Figures

- **Figure 1:** Flood/Temperature sensor topside

- **Figure 2:** Flood/Temperature sensor underside

• **Figure 3:** Sensor under a sink

Placement tips

- Place on a flat surface with the underside facing the floor. No mounting brackets or screws required.
- **Water detection:** Place in areas prone to leakage and where water is most likely to pool.
- **Extreme temperature detection:** Place in areas where temperatures may reach below 41°F or above 95°F.
- You can enable or disable any of the sensor's modes from the panel.

Install your Flood/Temperature sensor

Step 1 Pair sensor with the panel. Settings ( button) > Devices > + > Select Water > Follow the panel's instructions to pair your sensor.

- Step 2** Follow the panel's setup prompts to name and assign your sensor to a location.
- Step 3** Place your paired sensor as desired.
