signify SGn-2388FL Instruct Software

Specifications

- Product Name: Instruct Software
- Designed for: Interact projects
- Compatibility: Foundation and Advanced tiers of the Interact offering
- Manufacturer: Signify

Product Usage Instructions

1. Accessing the Tool:

Log in to the Signify Portal to access the Instruct Software tool using single sign-on.

2. Creating and Managing Projects:

Create your own projects within the tool and upload floor plans. Scale the floor plan and search for luminaires and control devices to add to the project.

3. Designing the Layout:

Drag, drop, and label luminaires and devices on the floor plan. Visualize wireless and occupancy coverage to ensure optimal placement.

4. Documenting and Exporting:

Add notes to the project and show/hide them as needed. Generate a bill of materials and export it to the Signify Portal. Create a package of documents for comprehensive project documentation.

5. Collaboration and Management:

Upload external documents to the project for reference. Group select products for easy management – move, assign network numbers, delete, and align items as required.

6. Startup Service Calculation:

Calculate the quantity of startup service days required for the project within the tool.

7. Support:

If you encounter any issues or need assistance, refer to the user manual or contact Signify support.

Frequently Asked Questions

- **Q: Can I use Instruct Software for projects outside of the Interact offering?**
    - A: No, Instruct Software is specifically designed for Interactprojects and is compatible with Foundation and Advanced tiers only.
- **Q: How do I access the generated bill of materials?**
    - A: You can export the bill of materials to the Signify Portal for easy access and further processing.

**Introducing a new design tool for your Interact projects**

Benefits

- Simplify your specification workflow
- Quickly create a bill of material
- Validate luminaire and controls configurations
- Visualize sensor coverage patterns
- Integrate seamlessly into your quoting process
- Generate a comprehensive BOM (link supplementary documents and build a submittal package)

Features

1. Single sign-on into the tool
2. Create and view your own projects
3. Upload floor plan
4. Scale floor plan
5. Search for luminaires and control devices
6. Drag, drop and label luminaires and devices in floor plan
7. Visualize wireless and occupancy coverage
8. Validate wireless design
9. Add notes and show/hide notes
10. Generate and export bill of materials to the Signify Portal
11. Generate a package of documents
12. Upload external documents to project
13. Group select products and move, assign network numbers, delete and align

14. Calculate the quantity of startup service days required
15. Compatible with Foundation and Advanced tiers of the Interact offering

To get your design started, log on the Signify Portal
