Safety and Notice

The device has been tested for conformance to safety regulations and requirements, and has been certified for international use. However, like all electronic equipment, the device should be used with care. Please read and follow the safety instructions to protect yourself from possible injury and to minimize the risk of damage to the unit.

- Follow all instructions and warnings marked on this unit.
- Do not attempt to service this unit yourself, except where explained in this manual.
- Provide proper ventilation and air circulation and do not use near water.
- Keep objects that might damage the device and assure that the placement of this unit is on a stable surface.
- Use only the power adapter and power cords and connection cables designed for this unit.
- Do not use liquid or aerosol cleaners to clean this unit.
- Always unplug the power to the device before cleaning.

Features

- Control center of the IP-based Transmitter and Receiver (CE-H28A11-S1, CE-H27F11-S1 & CE-H27G11-S1)
- Monitors all devices in one central system
- Cost effective solution for IoT

- Intuitive and powerful user interface
- Includes Web interface and mobile support
- Easy installation with auto-detection of transmitter and receiver units in the network.
- Drag-and-drop easy matrix switching
- Easy to create multiple video walls
- Schedule time for audio/video mapping, cycle-play and mute/resume
- Allows to create custom OSD
- Watch-dog with self-recovery
- Assigns the video sources for each display with account/password submit Supports video wall function
- Supports video wall function

Package contents

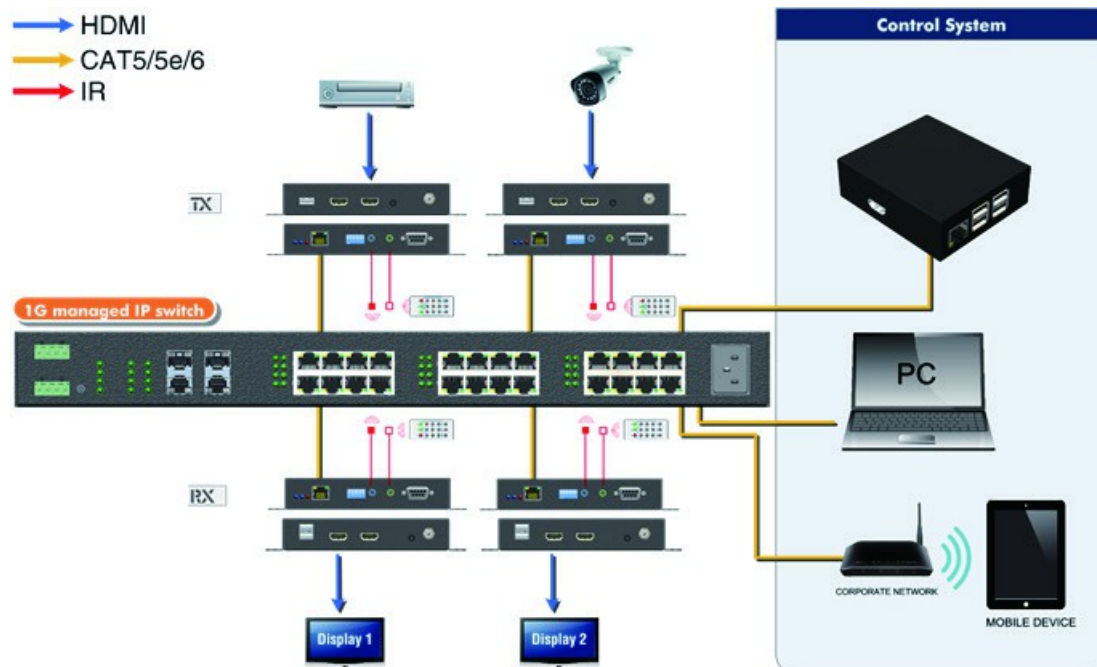

- HDMI Video Wall Over IP Multicast System Controller
- Power adapter DC 5V / 0.85A
- Rack-mounting ear set
- User Manual

Layout

1. **Output:** HDMI output, it displays the information of controller
2. **RJ-45:** Ethernet control port
3. **USB:** Reserved
4. **Activity LED indicator:** When the storage device is being used, the light will blink
5. **Power LED indicator:** When unit connect a power supply unit, the light will shine
6. **Power jack:** Connect to DC 5V/1A power adapter

Application

OPERATION

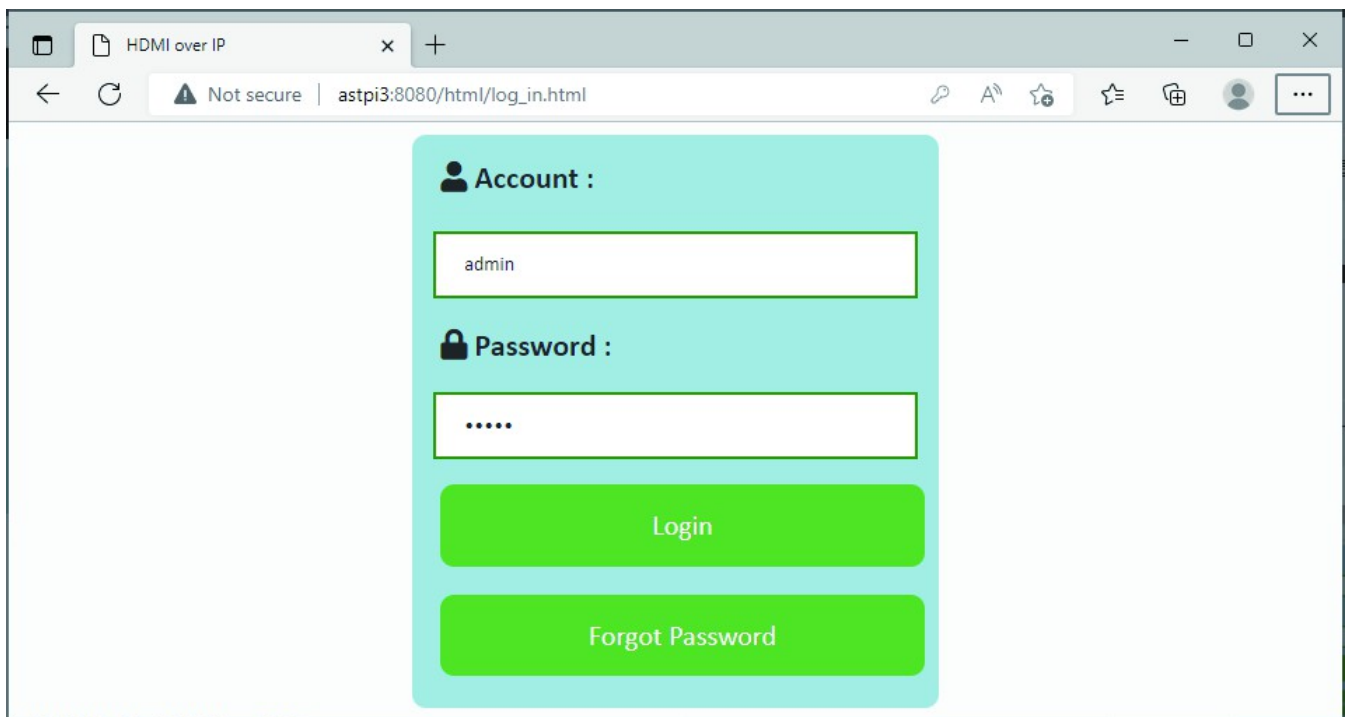

Installation Setup

1. Connect the PC & controller into the Gigabit IP Switch/ Router
2. Connect controller HDMI output to display. The display will show information, as below image. (Default DHCP Enable)
3. Open browser and type in controller's IP or type <http://astpi3> will into WEB control page.
(*Default Account/Password are admin/admin)

Device Name	HDMI over IP
Firmware	scaV1.00.00
System Time	2022-07-08:10:39:45
Link Status	Up, 100M Full
DHCP	Enabled
IP Address	192.168.100.145
Netmask	255.255.255.0
Gateway	192.168.100.1
DNS	8.8.8.8
MAC Address	B8:27:EB:58:0E:AB
URL	http://astpi3

Mapping

On this Page, you can see runtime status of all TX/ RX device in controller. The way to do input/output mapping is to drag TX icon to RX icon. It also provides 10 profile spaces to save the frequently used scenarios into the device. Clicking the profile button to preview the saved scenarios.

Type	Button	Function
RX/TX Settings		Edit device name
		Click the button to search for corresponding TX/RX device, and the device LED light will blink for 5-10 seconds.
		Sub-stream
		Channel
		IP address
		Turn on/off the Video
		Number of RX subscribed to this TX
Mapping Settings		Drag the TX icon to the  button to switch all RX
		Manage presets
		Provide 8 preset spaces for user to save
		Select which preset to recall
		Refresh the page
		Set the user interface of mapping table page

Video wall

1. Video Wall Option The method of setup the video wall is to do input/ output mapping on the Mapping page, and then select RX in the RX list of the Video Wall page to set the layout.
2. Bezel and Gap Compensation Set the bezel and gap of the RX video wall to achieve seamless splicing of display screens. After completing the settings, click the “Apply” button to enable the bezel and gap Compensation.
 - OW: outside width
 - OH: outside height
 - VW: viewable width
 - VH: viewable height
 - * VW must be less than OW and VH must be less than OH.
 - * The field may not be blank, if users do not need this function, please set all values to 1.
 - * The value must be an integer.

3. Wall Size & Position Layout Set the layout to split the video into multiple zones.

Then set the row position and column position to select video zone to output. After completing the settings, click the button to enable the video wall.

The examples are as follow:

Layout		Column Position		
3x3		(0,0)	(0,1)	(0,2)
Row Position	1	(1,0)	(1,1)	(1,2)
Column Position	2	(2,0)	(2,1)	(2,2)
