Permafrost series liquid cooling  
user's manual

Secure the fan together with the radiator onto the chassis

Please clean the surface of CPU before applying thermal grease evenly on the CPU

Remove the INTEL clips and install the AMD clips

### AMD 3

Remove the film from the waterblock's base and place it on the CPU

### AMD 4

Hook the clip onto the motherboard's cooler retention bracket

Connect the water block and fan connectors onto the relevant motherboard connectors, installation complete

Make sure you are using the correct side of the backplate for your motherboard and insert the screw into the correct holes based on the CPU socket you use

Install the backplate assembly onto the motherboard and slip on the screw standoffs \*Mount LGA2011 and INTEL clips and tighten the nuts

Please clean the surface of CPU before applying thermal grease evenly on the CPU

## Intel 4

Remove the film from the waterblock's base and place it on the CPU

## Intel 5

 SPRING SCREW

Secure the spring screws onto the screws with a screwdriver

Connect the water block and fan connectors onto the relevant motherboard connectors, installation complete

Please confirm the connector, the definition, and direction of your pin header when connecting cables

- Ensure ARGB controller/motherboard has same +5V pin definition as PF120/PF240/PF360
