Product Usage Instructions

TuyaAPP Adding and Connect

1. The mobile phone should connect to the same WiFi as the monitor.
2. Download Tuya Smart or Smart Life-Smart Living from Google Play or APP Store.
3. Open the software and click Add Device, and the app will search and pair the device.
4. When the WiFi monitor device is found, press Add. And the device is adding.
5. Wait for it to be done, then press Done. Finally, the device is added successfully.

How to Share to Other Users

An easy way is to log in to your account on the app on other family members' phones. Another option is to add their account on your APP.

1. Go to "Me" and enter the Home Management.
2. If you don't use Tuya or Smart Life before, complete the Home Information by naming the family group (e.g., myhome). In Home Settings, add family members.
3. Enter the name of the member to be added and their registered account (telephone or email). Remember to save, and this member is added successfully.

Operations

Video Conference Call

To call the monitor, press the button on the call panel. Then, the monitor shows an image of the call panel. Touch the buttons shown on the screen to answer, hang up, or unlock the door.

Monitor

- To monitor the call panel, touch the monitor button on the screen.
- Touch the call panel name to switch between call panels.
- Touch the photo or video button to record manually.
- Touch the sound button to adjust volume.
- Touch the unlock button to unlock the door.
- Touch the MIC button to mute.
- Touch the hang up button to finish monitoring.

Photo and Video

- When the call panel calls the monitor, the monitor will take a photo or video automatically according to record settings.
- While monitoring, touch the snapshot button to take a picture.
- To check records, touch the photo or video on the screen.

Setting

- Ringtone
- Record Date & Time
- Turn Off Screen
- Delete Language
- Format TF Card

FCC

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
 2. this device must accept any interference received, including interference that may cause undesired operation.
- This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
