Specification

Model no.	BJ-01
Input	DCSV
Output	DC7.4V, SSW
Juice cup capacity	380ml
Citrus juice cup capacity	220ml
Rotation speed	18000rpm
Charging time	Approx. 3 hours
Operation time (full charges)	Around 16 times (for blender) 40S) Around 28 times (3 mins) & 85 times (1 min) (for juicer)

Operating Instructions

A. Before first use

1. Unpack the unit
 - Remove the unit from the packaging and unpack all the accessories as well as the printed documents.
 - Remove all accessories and clean all accessories thoroughly.
 - Put the parts back into the unit.
2. Charge the unit
 - When you receive the machine, charge it for 3 hours first. During charging, the LED indicating light will go on in Red color. When the charging is finished, the light will turn to White color on.
3. Charge Alert

- When the blender is low on power, the LED will flash red

B. Operation

Use as Blender:

1. Wash and cut the fruit into small pieces (please get rid of nuts, hard items, thick skin etc.). Ice cubes or too much pulp may also cause the blades to get stuck. Shaking the cup can make the blender work better, Milkshakes or smoothies will be more uniform.
2. Put the fruits into the juice cup at about 60% of the max capacity. Then, add water into the juice cup to the max level or below.
3. install the unit cover to the side of airhole of the main unit(**Fig.1**).

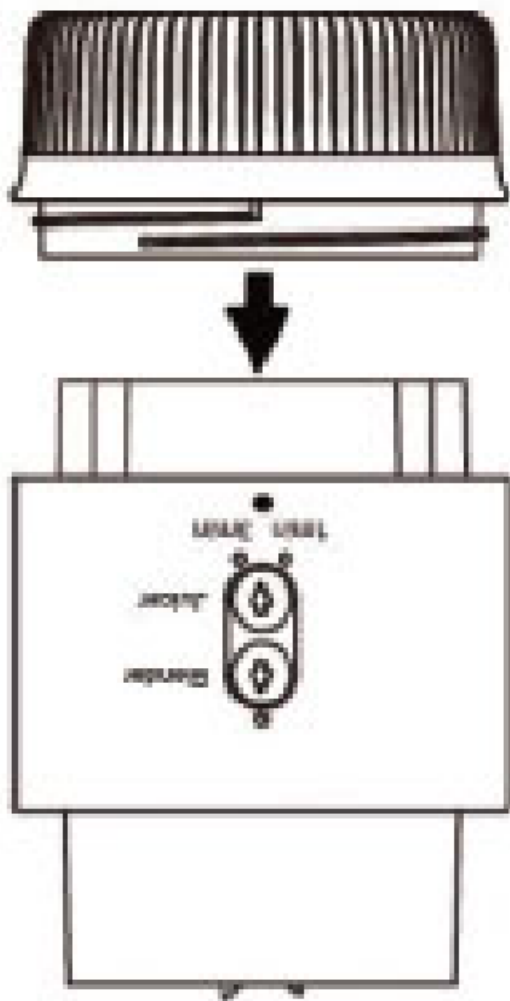

Fig.1

4. install the main unit to the juice cup (with in gradients)by turning the manumit lock wisely until you hear a “beep” sound (**Fig. 2**).

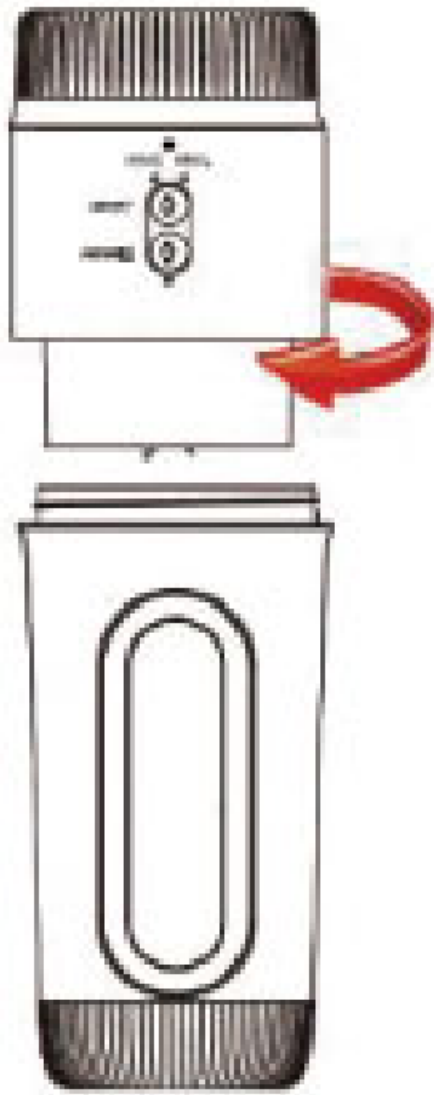

Fig. 2

5. Place the minion upside-down on a flat surface(**Fig .3**).

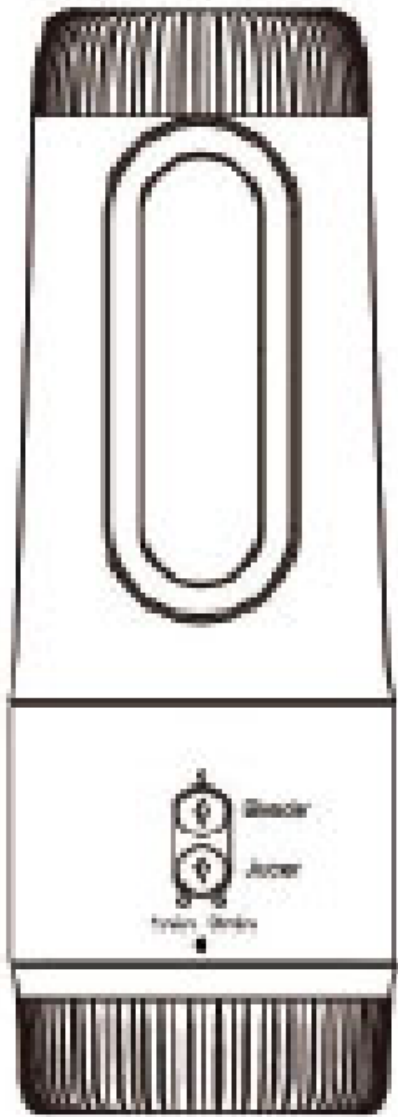

Fig. 3

6. DoubleClick the Blender button to start the blending. The corresponding indicator will go on in White color accordingly.
7. After 40 seconds, the unit will stop operation automatically. Or you could stop the operation at any time by pressing the Blender button once.
If the mixtures opt we limited ,start the unit to blend again.
8. Remove the main unit carefully by turning ant-clock wisely and you can enjoy the juice directly from the cup. Or you could cover the juice cup with the cup cover (**Fig. 4**) and put into the refrigerator for storage.

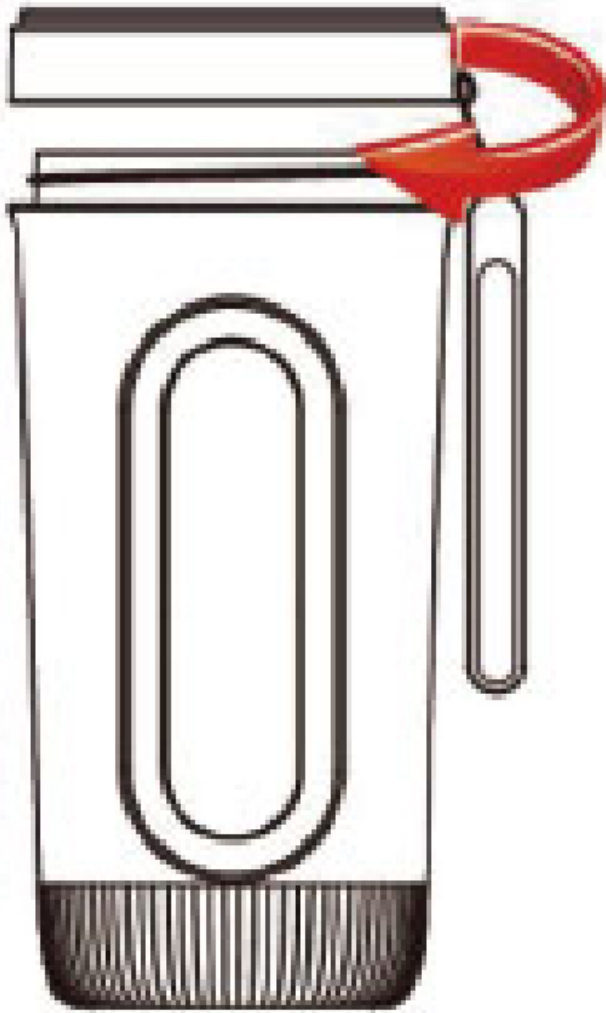

Fig. 4

Notes:

1. Blades are sharp, please handle with care!
2. The unit can be used for ice crushing. But, please blend the ice immediately once get out from the freezer.

Use as Citrus Juicer:

1. install the unit cover to the side of blades of the main unit by turning clock wisely (**Fig. 5**).

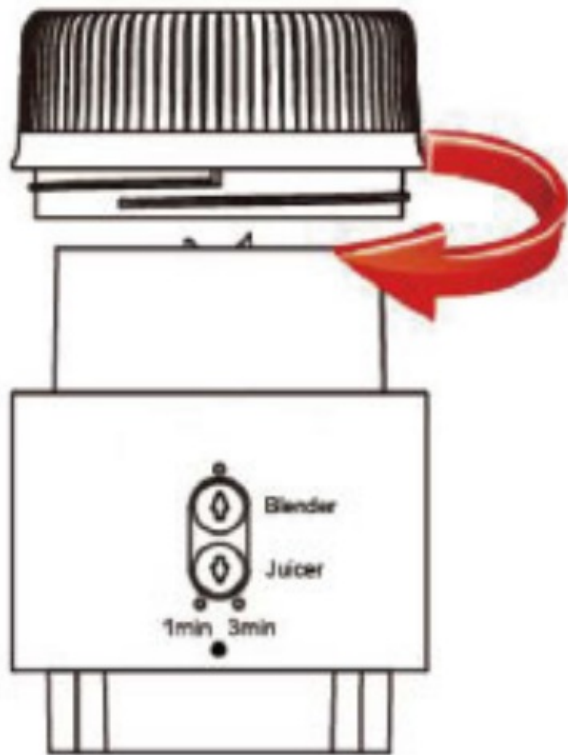

Fig. 5

2. The installation is well finished until there is a “beep” sound. Then put the main unit upside down on a flat and stable area.
3. Put the citrus juice cup onto the main unit by aligning the dots (**Fig. 6**).

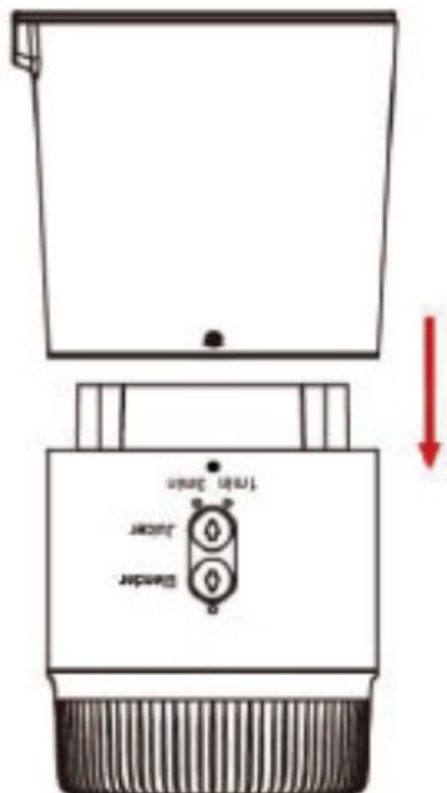

Fig. 6

4. Then, put the citrus juice filter onto the citrus juice cup (**Fig. 7**).

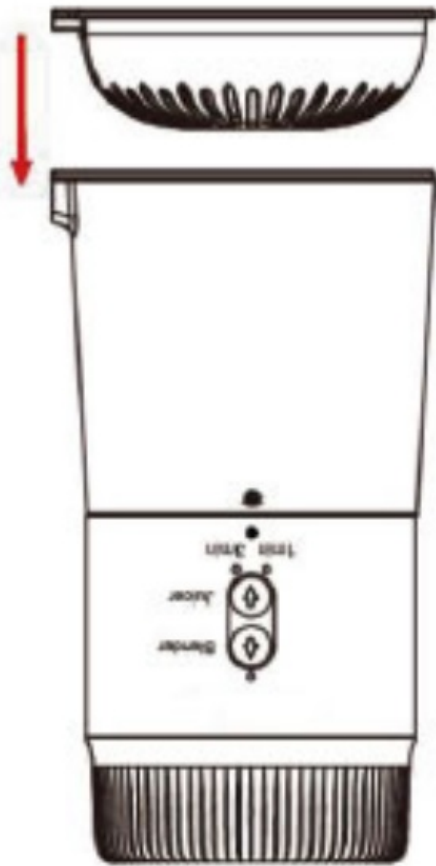

Fig. 7

5. install the axis in the middle of the filter (**Fig. 8**) and press it firmly into the axis hole.

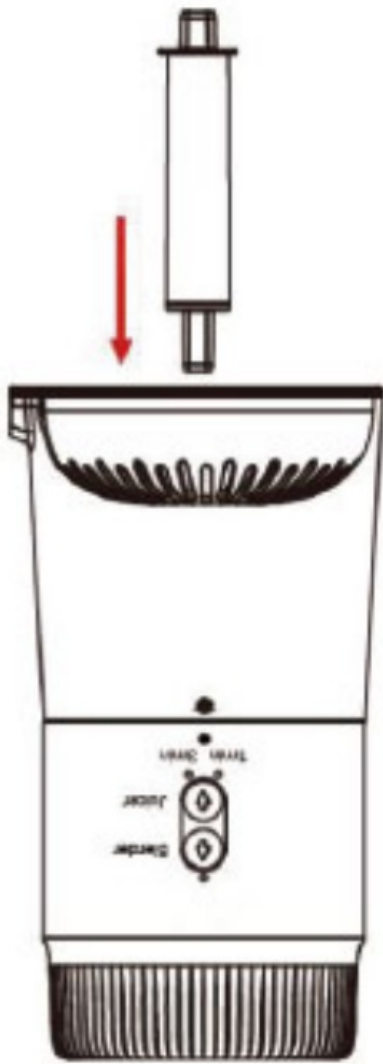

Fig. 8

6. Put the citrus juice cone align with the axis (**Fig. 9**).

Fig. 9

Wash and cut the Citrus (like orange, lemon or grapefruit) into half.

7. Double click the Juicer button to start the operation. You can select the operation for 1 minute or 3 minutes by pressing the Juicer button. The unit will stop operation automatically when the selected time is reached. 3 seconds after the time is selected, the corresponding indicator light will go on in White and there is a “beep” sound.
8. Put the half citrus on the cone and squeeze it by hand (**Fig. 10**).

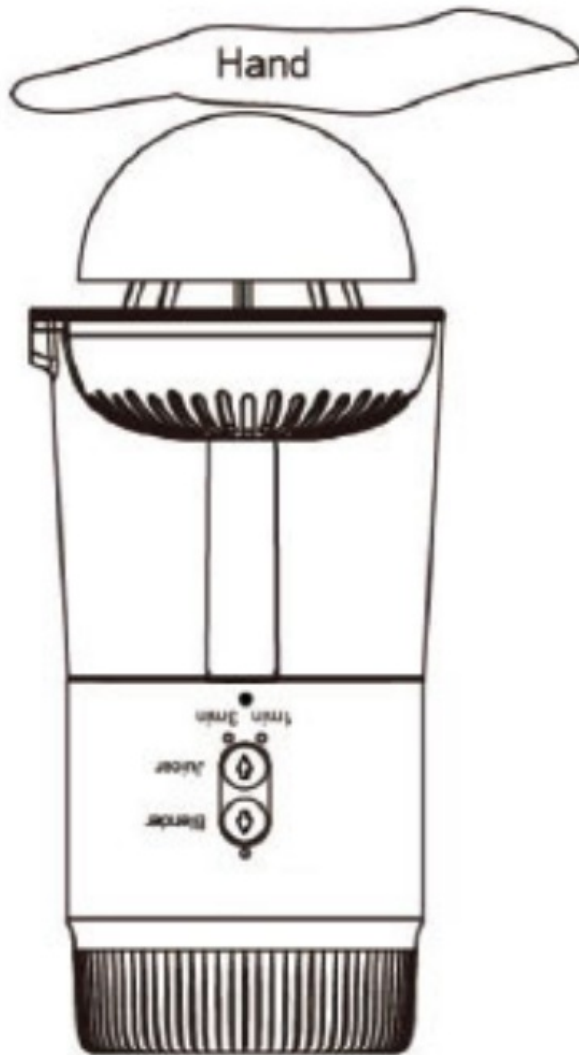

Fig. 10

9. You can stop the operation at any time by pressing the Juicer button once.
10. After finishing, pour the citrus juice into a cup and enjoy.

Notes:

1. Pulp buildup on citrus juice cones and filters can interfere with juicing and needs to be removed during use.

Use as juice maker:

Install the unit cover to the side of blades of the main unit by turning clock. wisely (**Fig. 11**).

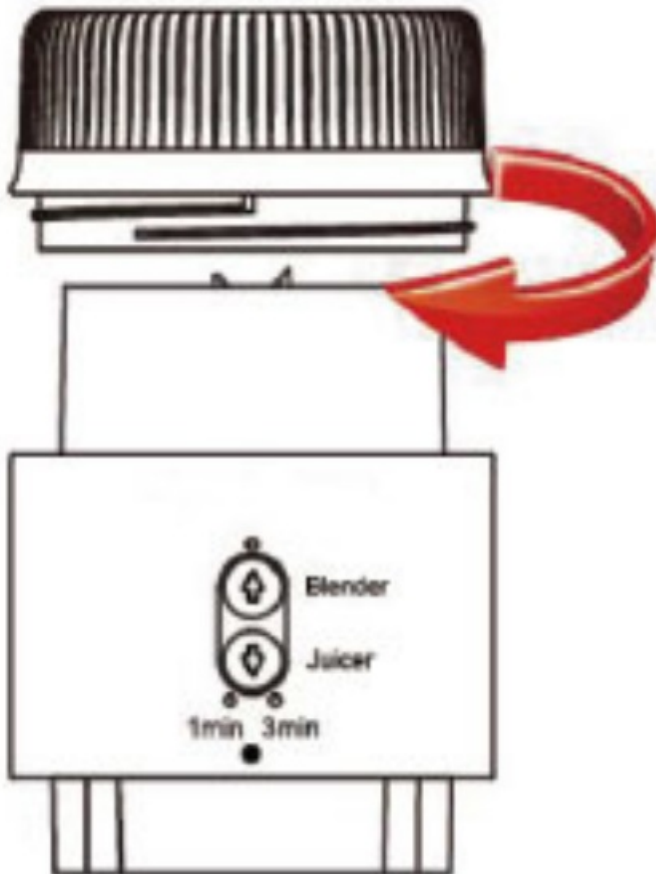

Fig. 11

The installation is well finished until there is a “beep” sound.
