Next

This screenshot shows the 'Choose your Gmail address' screen. It has a dark background with white text. The title 'Google' is at the top, followed by 'Choose your Gmail address' and 'Pick a Gmail address or create your own'. There are three radio buttons: two for pre-selected addresses ('uuuhtk@gmail.com' and 'hktuuu@gmail.com') and one for 'Create your own Gmail address'. Below the radio buttons is a text input field for 'Create a Gmail address' followed by '@gmail.com'. A blue 'Next' button is at the bottom right. A red box highlights the 'Create your own Gmail address' radio button and the text input field.

7. After creating the account, click “Next” to allow location access for detecting your Wi-Fi network.

Location access

Location access is needed to detect nearby Wi-Fi and Bluetooth signals to determine your location during your home and device setup process

Help

Next

8. Click "Turn on" to turn on Bluetooth and improve the connection to your Wi-Fi network.

Turn on Bluetooth

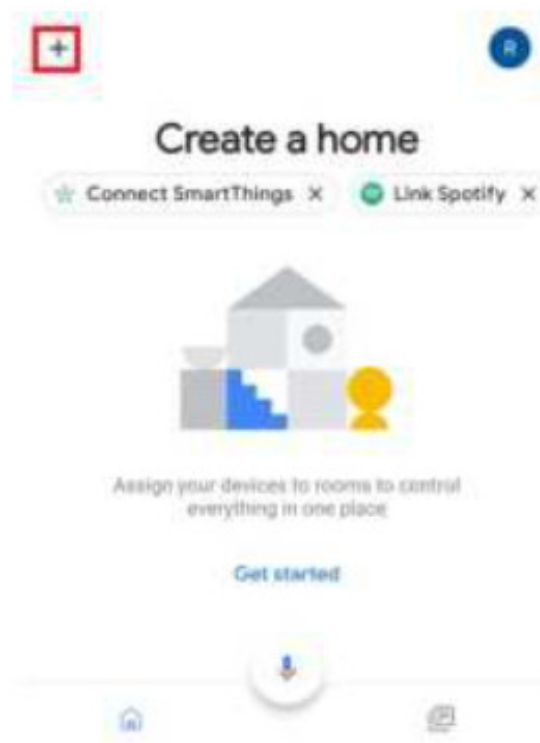

Bluetooth access is needed to improve the connection to your device, determine your location during setup and discover and set up nearby devices. You can turn it back off when you've finished with setup.

Cancel

Turn on

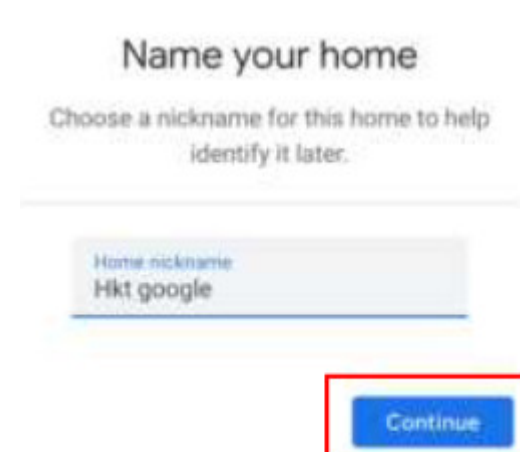

9. After entering the home page, click the "+" sign at the top left hand corner.

10. Select “Create new home”.

11. Name your home and click “Continue”.

12. You will be asked to fill in home address information. You can choose to skip it by clicking “Skip”.

Turn on Wifi router and point usage stats?

Automatically send anonymous Wi-Fi feature-related usage statistics and crash reports from all Wifi devices in your Wi-Fi network to Google in order to improve Google's Wifi products. This setting applies as you add or remove Wifi devices to this network. [Learn more](#)

You can turn this off at any time in your network settings.

No thanks

Yes, I'm in

25. Click “Yes, I’m in”.

Turn on Nest Wifi cloud services?

Cloud services and your privacy

Nest Wifi can store and analyse data about your entire network and devices (including your router) to provide peak performance, useful network insights and help when you need it. [Learn more](#)

Please note that by not turning on cloud services, some features like the following may not work as optimally:

- Family Wi-Fi
- Guest network
- Advanced networking
- Device list

This setting applies as you add or remove Wi-Fi devices to this network. You can turn this off at any time in your network settings.

No thanks

Yes, I'm in
