Smart Tint SSWTT-48-108 Stealth Transition Window Tint

INSTRUCTION

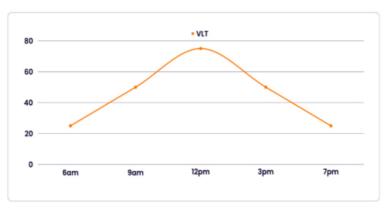

Company Overview

Stealth Tint® Transition Window Tint™ requires no power or wires to operate and is a state-of-the-art smart film® solution. Stealth Tint® changes from clear (75% VLT) to dark (25% VLT) upon sunlight exposure. The level of Tintin the film will brighten and darken according to the level of sunlight it is exposed to automatically changing with no power required. Stealth Tint will block 99% UV in all transitional stages.

Thanks to Stealth Tint™'s advanced UV Transition Window Tint™ technology, Stealth Tint™ effortlessly adjusts to your surroundings, continuously cycling through its premium range of shades to provide the perfect level of sunlight control with no power needed.

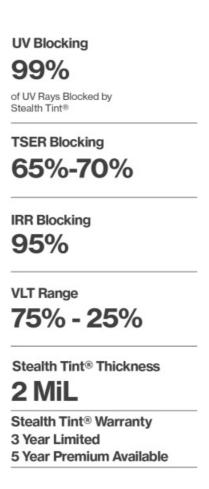

Stealth Tint® UV Exposure Chart

Stealth Tint® VLT

NO POWER & NO WIRES

StealthTint® autonomously transitions from light to dark and back again in response to sunlight, eliminating the need for electrical connections or professional installation. It can be easily applied in a wet state, similar to traditional window tints.
