INSTALLING THE RECEIVER

- Insert the receiver into the wall outlet.

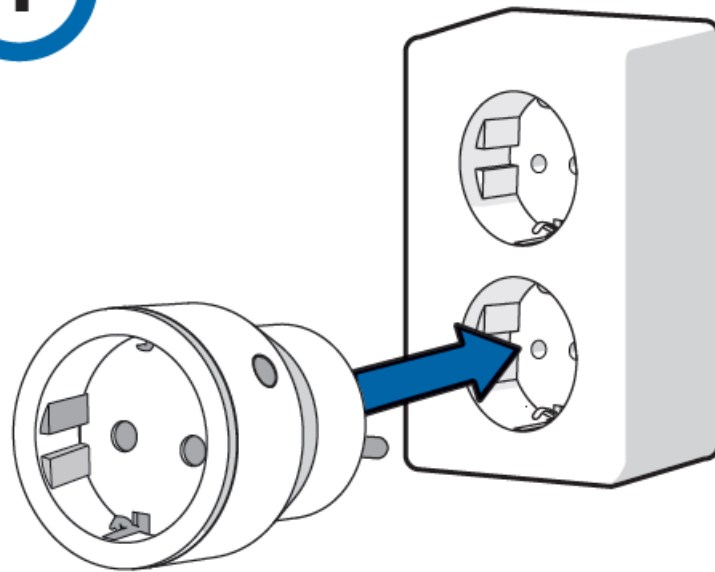

Pairing the receiver with a sender

- A. Press and hold the button on the receiver for 3 seconds, then release it. The LED starts to blink. Your receiver is now switched to pairing mode.

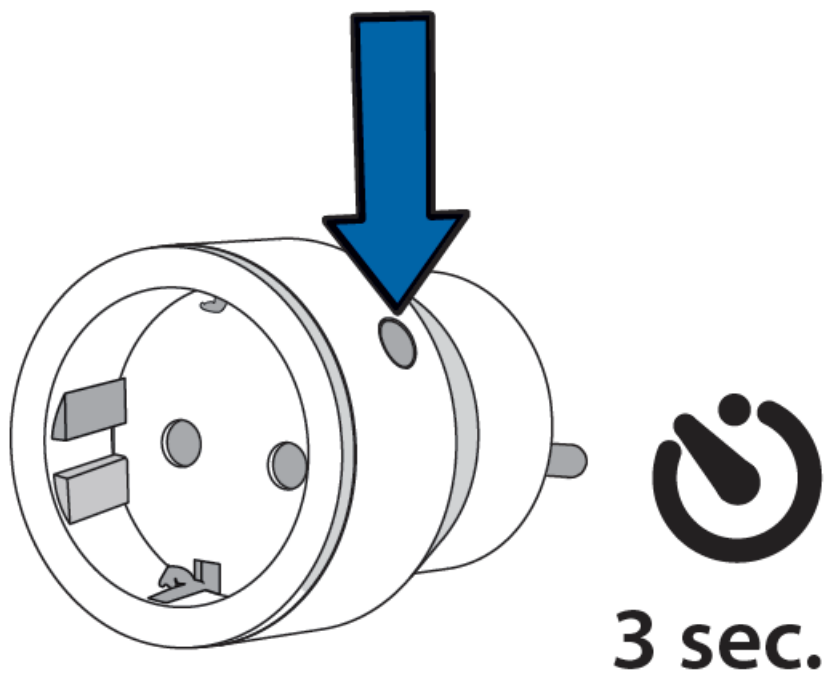

Attention: the LED should only blink after releasing the button. If the LED starts to blink while holding the button, there will be no pairing.

- B. Press the on button on the sender (see the instructions given in the manual for the sender).
- C. The LED on the receiver will light up.
- D. Your receiver and sender are now paired.

1

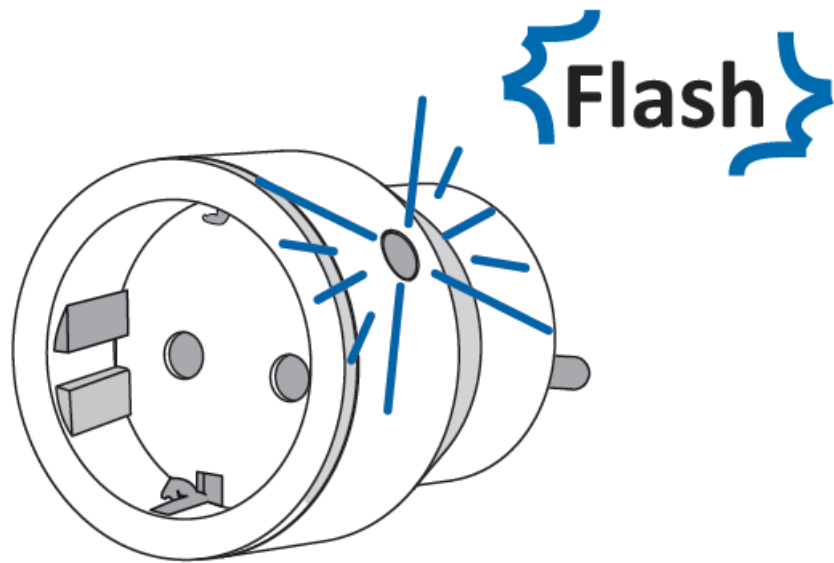

2

Preparing the receiver

- Connect a desired device to the receiver and make sure the desired device is switched on. Now, the receiver is ready for use.

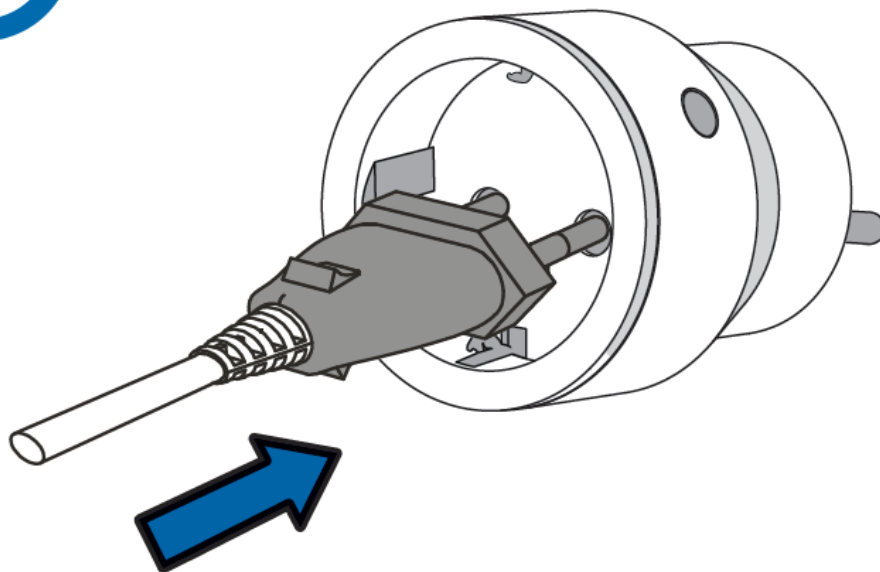

3

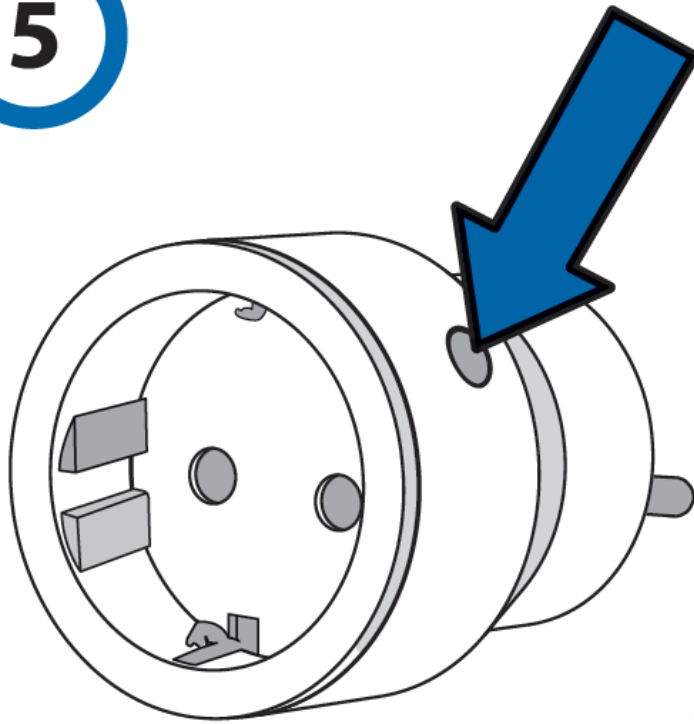

DISCONNECTING ALL LINKS

- A. Press and hold the button on the receiver for 10 seconds until the LED starts to blink.
- B. When the LED on the receiver turns off, all links will be disconnected.

4

5

10 sec.

Specifications

- Maximum power: 2300W
- Frequency: 433.92MHz
- Maximum RF output: 0dBm
- AC input: 230V ~ 50Hz
- Maximum range: 30 m
