## **SNAP POWER Hug Lock Latches With Indexing Function**

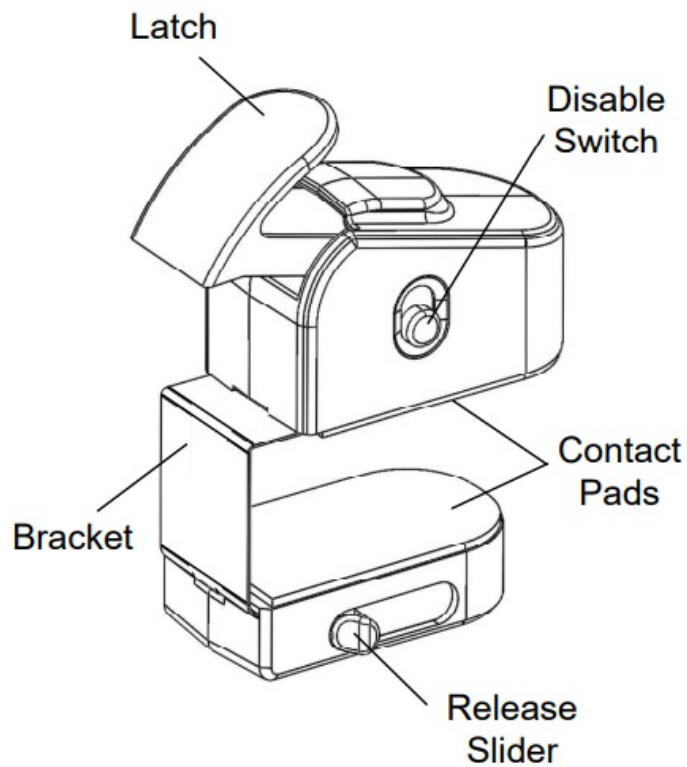

## Description

The HugLock is a child-resistant door lock designed specifically for interior doors such as pantries, closets, bathrooms and bedrooms. However, the HugLock is a convenience device to limit a child's access to certain areas, not a substitute for adult supervision and is not intended to be a primary safety device.

## Benefits

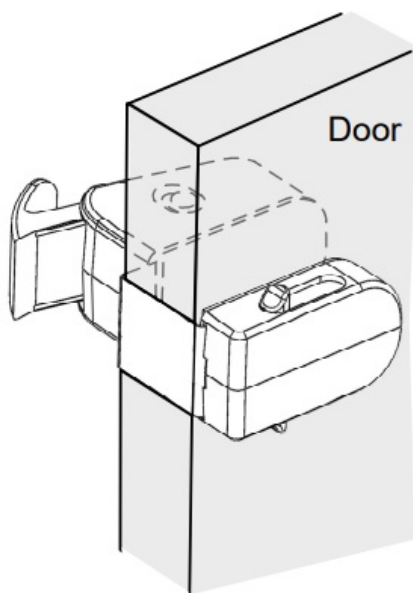

- **Child-Resistant Design:** The HugLock is placed on doors out of the reach of children and keeps them from opening doors that should remain shut.
- **Easy Installation:** The HugLock installs in seconds over the edge of your door, without the need for tools or adhesives.
- **Adjustable Height:** Fits around the edge of the door either on the vertical side or on the top edge, out of the reach of young children.
- **Durable Construction:** Withstands up to 50 lbs. (22.5 kg) of opening force.
- **Convenient Operation:** Designed to be easily operated from either side of the door.
- **No Damage:** No need for permanent changes to your door structure. Will not cause damage to door, frame, or paint.
- **Versatile:** Works with any style of door knob or lever.

## Product Overview

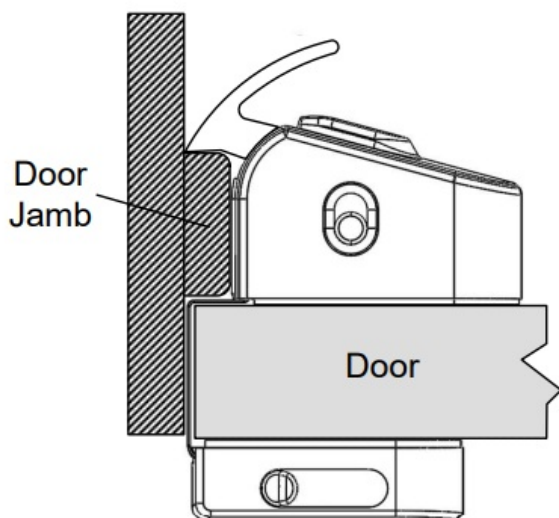

## How the HugLock Works

- The HugLock fits over the edge of an interior door.
- When the door is closed, the latch engages with the door jamb and prevents the door from opening.

The HugLock fits over the edge of an interior door.

When the door is closed, the latch engages with the door jamb and prevents the door from opening.

## Installation Instructions

### WARNING

- THE HUGLOCK IS NOT A SAFETY DEVICE.
- HAZARDS SHOULD BE SEPARATELY SECURED.
- THE HUGLOCK IS NOT A SUBSTITUTE FOR ADULT SUPERVISION.

**Step 1: Select the interior door you want to secure and determine the location of the HugLock on the door**

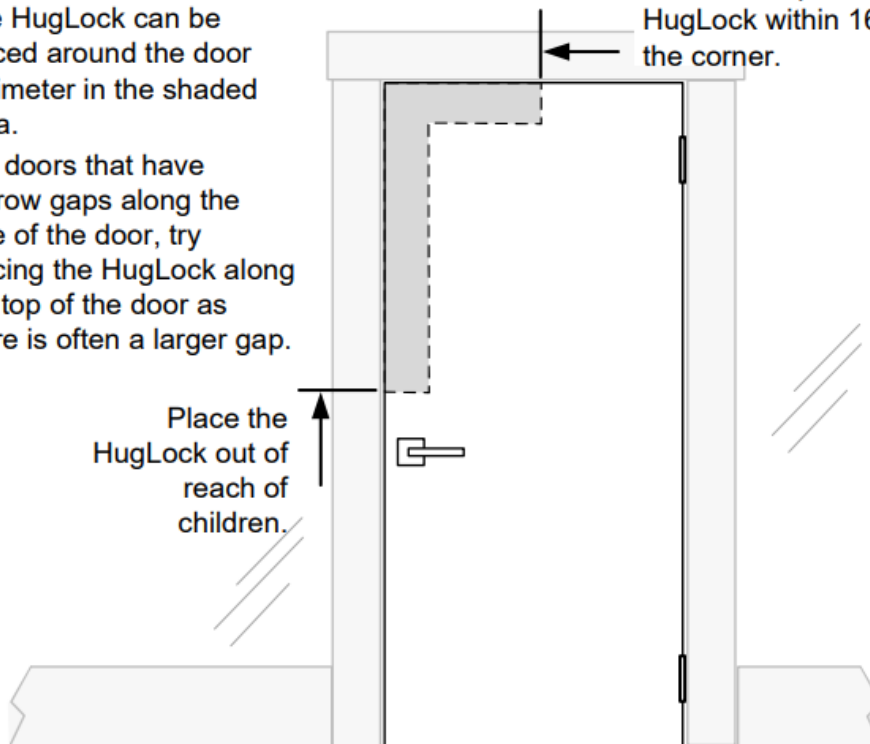

**Placement**

The HugLock can be placed around the door perimeter in the shaded area.

For doors that have narrow gaps along the side of the door, try placing the HugLock along the top of the door as there is often a larger gap.

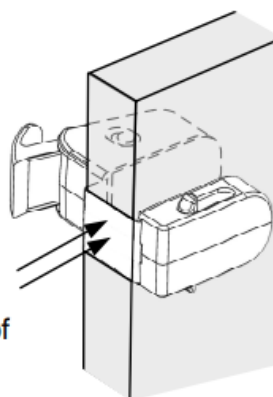

Place the HugLock out of reach of children.

If used on the top edge of the door, place the HugLock within 16" of the corner.

**Step 2: Push the HugLock over the edge of the door**

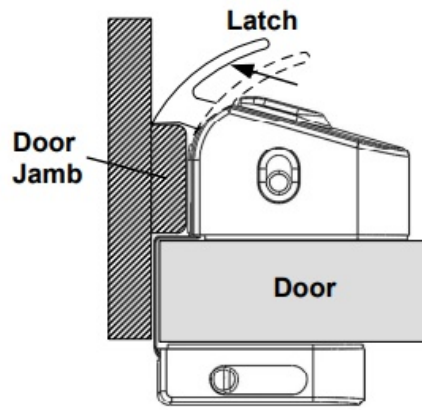

Push the HugLock over the door until the bracket securely contacts the edge of the door.

The HugLock should firmly grip the door.

**Step 3: Close the door**

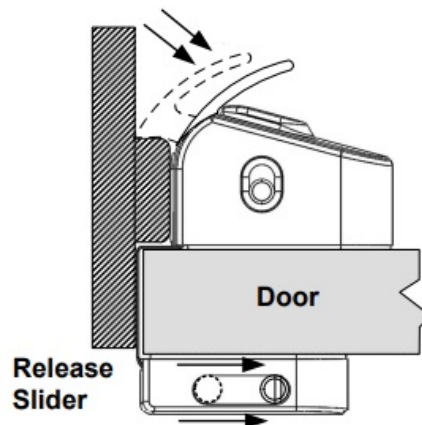

When the door is closed, the latch automatically engages with the existing door jamb and prevents the door from opening.

#### Step 4: Open the door

To open the door from the latch side of the door, press the latch to disengage it from the door jamb.

To open the door from the opposite side, move the release slider away from the edge of the door.

#### Using the Disable Switch

The disable switch secures the latch in a retracted position. This prevents the latch from engaging the door jamb and locking the door.

##### To engage the disable switch:

1. Push the latch back into latch body.
2. Push the disable switch toward the latch. The latch is now secured in its retracted position and will not lock the door.

To release the latch, move the disable switch downward. The latch will then fully extend.

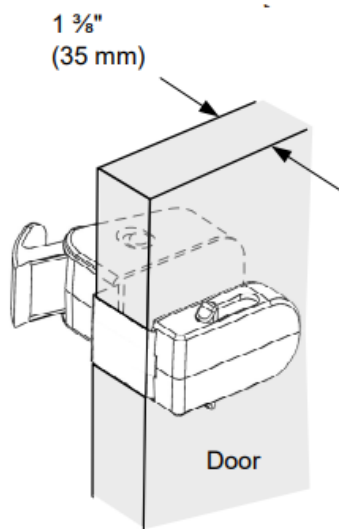

## TROUBLESHOOTING TIPS

ISSUE	TROUBLESHOOTING TIPS
You can't fit the HugLock over your door.	Is your door 1 $\frac{3}{8}$ " (35 mm) thick? If not, you will need to use the HugLock on a different door. <i>"Door Geometry"</i>
The door won't shut with the HugLock installed.	Is the HugLock bracket pushed all the way against the edge of the door? <i>"HugLock Fit"</i>
	Is the gap between the door and the door frame at least 0.05" (1.2 mm) wide? If not, try installing the HugLock in a different location on the door where there is a larger gap. <i>"Door Gaps"</i>
The HugLock falls off the door during use.	You could use the HugLock on the top edge of the door where gravity will help hold it on. <i>"Placement"</i>
	Slightly bend the bracket together for better grip, reinstall the HugLock.
	Is your door less than 1 $\frac{3}{8}$ " thick? The HugLock only works on standard interior doors. <i>"Door Geometry"</i>
The latch slips off the door jamb, allowing the door to open	Look for reasons the latch is not catching on the door jamb. Is the door jamb less than $\frac{1}{2}$ " thick and less than 1 $\frac{1}{2}$ " wide? <i>"Compatible Trim – Door Jambs"</i>
	Is the latch extending all the way to the door jamb when the door is closed?
The release slider no longer pulls the latch back.	Your HugLock is worn out or damaged. If you need to open the door from the release side you need a new HugLock. See page 7, <i>"Release Function"</i>

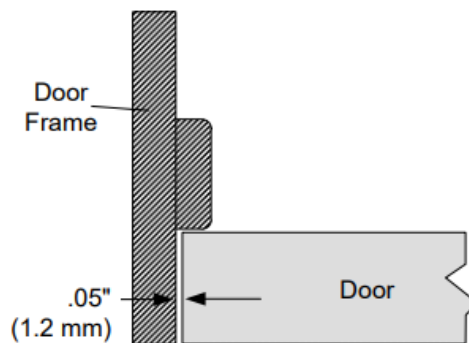

<p>The HugLock damaged my door.</p>	<p>Frequently monitor your door for damage. If you begin to see wear on frequently used doors, consider moving the HugLock to a different location, such as along the top of the door.</p>
-------------------------------------	--

## Compatible Door Geometry

- **Door Thickness:** The HugLock is designed to fit around standard interior doors that are 1  $\frac{3}{8}$ " (35 mm) thick.
- **Door Gap:** To ensure the door closes properly with the HugLock installed, there must be a gap of at least 0.05 (1.2 mm) between the door and the door frame.

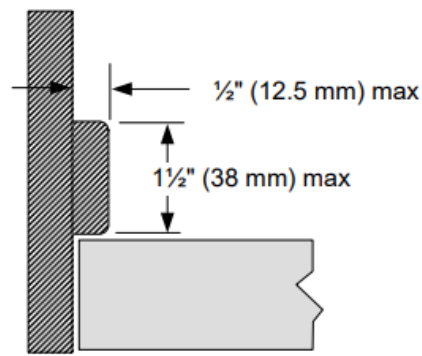

**Door Thickness:** The HugLock is designed to fit around standard interior doors that are 1  $\frac{3}{8}$ " (35 mm) thick.

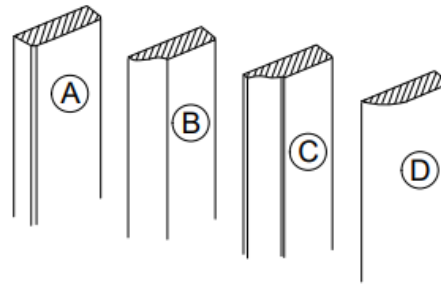

**Door Gap:** To ensure the door closes properly with the HugLock installed, there must be a gap of at least 0.05 (1.2 mm) between the door and the door frame.

## Compatible Trim – Door Jambs

- The HugLock is designed to grip door jamb that is thinner than  $\frac{1}{2}$ " (12.5 mm) and less than 1  $\frac{1}{2}$ " (38 mm) deep.
- The HugLock is compatible with a wide range of trim, including square trim (A), profiled trims (B, C) and rounded trim (D).

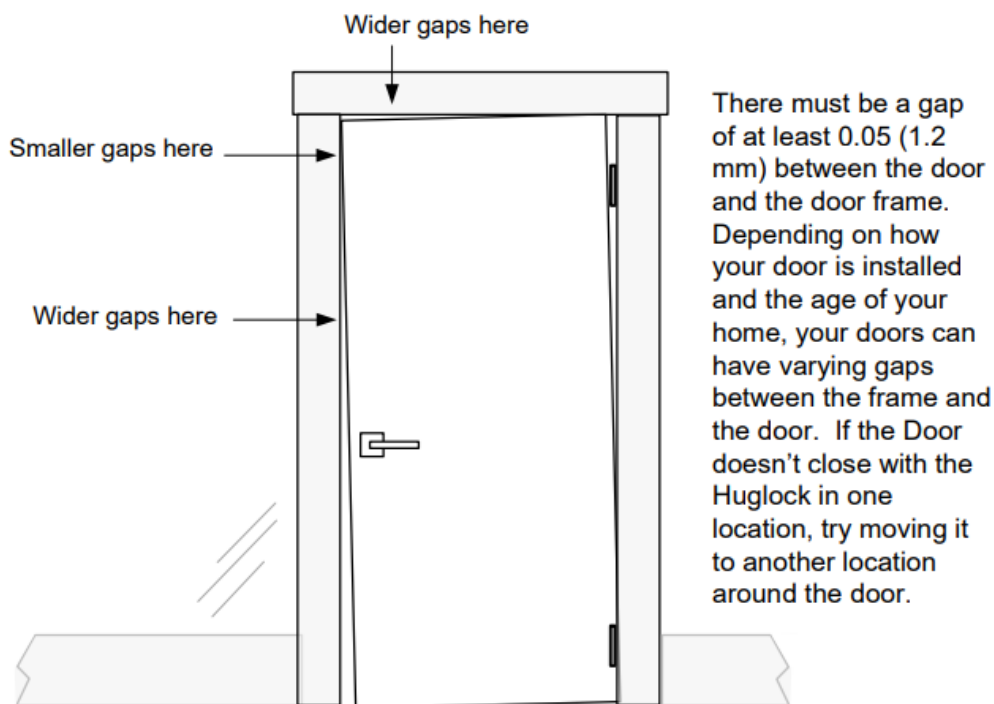

The HugLock is designed to grip door jamb that is thinner than  $\frac{1}{2}$ " (12.5 mm) and less than  $1\frac{1}{2}$ " (38 mm) deep.

The HugLock is compatible with a wide range of trim, including square trim (A), profiled trims (B, C) and rounded trim (D).

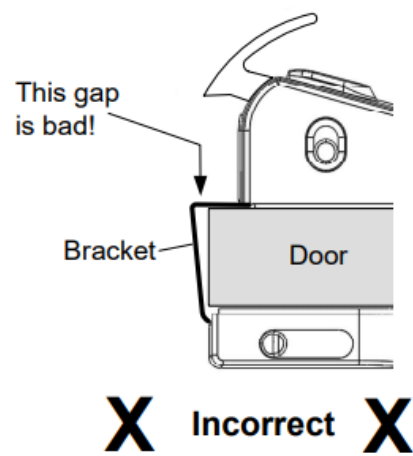

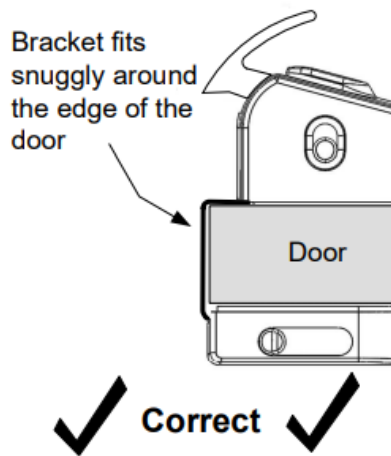

## Door Gaps

There must be a gap of at least 0.05 (1.2 mm) between the door and the door frame. Depending on how your door is installed and the age of your home, your doors can have varying gaps between the frame and the door. If the Door doesn't close with the Huglock in one location, try moving it to another location around the door.

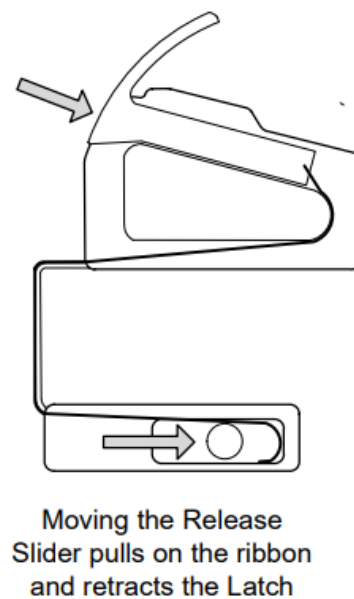

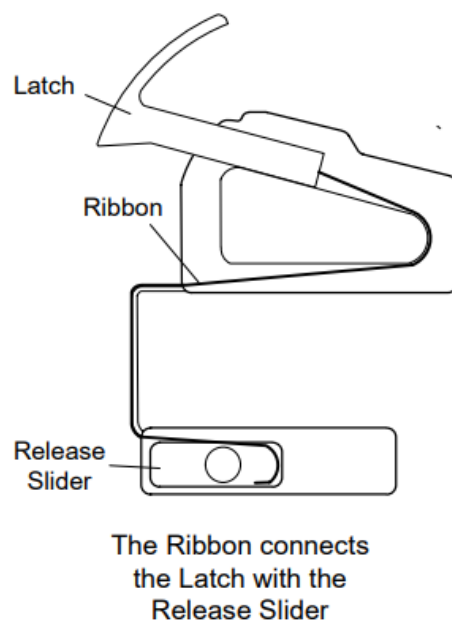

## HugLock Fit

Be sure there is no space between the bracket and the edge of the door. The bracket should tightly hug the edge of the door. If there is a gap, it can prevent the door from closing.

## Release function

## WARNING

- THE HUGLOCK IS NOT A SAFETY DEVICE.
- HAZARDS SHOULD BE SEPARATELY SECURED.
- THE HUGLOCK IS NOT A SUBSTITUTE FOR ADULT SUPERVISION.

## HugLock Design

Maximum withstand force	50 lbs (23 kg)
Maximum required force to release latch	5 lbs (2.3 kg)

## HugLock Usage Guidelines

The HugLock is for managing a child's access within the home for convenience, not as a primary safety device.

### **Supervision:**

The HugLock is not a substitute for adult supervision. Parents and guardians must always be vigilant. Always consider your child's capability and strength. For example, a child who stands on a chair can open a HugLock that would otherwise be out of reach. A motivated older child may be capable of applying more than 50 lbs. of force to the HugLock.

### **Supplemental Safety:**

Use the HugLock alongside other childproofing devices for areas with potential hazards.

### **Appropriate Uses for HugLock:**

- **Controlled Access:** Prevents children from entering non-hazardous rooms like home offices, laundry rooms, pantries, or storage areas.
- **Organizing Play Areas:** Keeps children in designated play areas. **Managing Pet Access:** Controls pet movement while allowing adult access. **Privacy for Adults:** Provides privacy in rooms like bedrooms or home offices.

### **Hazards Should Be Separately Secured**

- Hazardous materials such as cleaning supplies, medications, weapons, or tools should be separately secured.
- **Stairs:** Should be supplemented with safety gates or other devices. **Outdoor Areas:** Requires additional locks and alarms for doors leading to pools or streets.
- **Kitchens:** Needs other safety devices and supervision to protect against sharp objects, hot surfaces, and other hazards.

## **SNAPPOWER HUGLOCK LIMITED ONE-YEAR WARRANTY**

SnapPower warrants that the HugLock accompanied by this limited warranty is free from manufacturing defects in materials and workmanship for a period of one (1) year from the original purchase. For more information about the warranty go to:

[www.snappower.com/pages/warranty](http://www.snappower.com/pages/warranty) or scan the QR code.

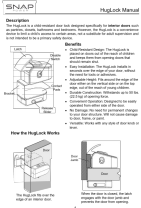

## Exclusions and Limitations

This limited warranty does not cover:

- Damage resulting from misuse, abuse, neglect, unauthorized alteration or repair, or improper installation.
- Normal wear and tear, cosmetic damage, or damage caused by accident, fire, flood, or other acts of nature.
- **Limitation of Liability:** To the maximum extent permitted by applicable law, the Company shall not be liable for any incidental, indirect, special, or consequential damages arising out of or in connection with the installation, use, or inability to use the product, including, but not limited to, any damage to the user's home, property, or personal belongings. This limitation applies even if the Company has been advised of the possibility of such damages.
- **Exclusive Remedy:** The remedies provided under this limited warranty are the exclusive remedies available to the customer. The Company's total liability under this limited warranty shall not exceed the amount paid by the customer for the product.
- **Parent/Guardian Responsibility:** The HugLock is designed as a convenience device to assist in limiting a child's access to certain areas, but it is not a substitute for adult supervision and is not intended to be a primary safety device. Parents and guardians are solely responsible for the safety and well-being of their children. The HugLock should not be relied upon as the sole means of keeping a child safe. Hazardous materials and areas must be separately secured. The Company shall not be liable for any injuries or damages that occur due to a failure to supervise or other acts of negligence by the parent or guardian.
- **No Other Warranties:** Except as expressly set forth above, the Company makes no other warranties, express or implied, including any implied warranties of merchantability or fitness for a particular purpose. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages or limitations on the

duration of an implied warranty, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from jurisdiction to jurisdiction.
