Installation

Place the Printer Horizontally

Install Filament Holders

Install Side Panel

Install Doors

Install the PEI Glass Plate

Connect the Power Cable

Using the Printer

Turn on the printer.

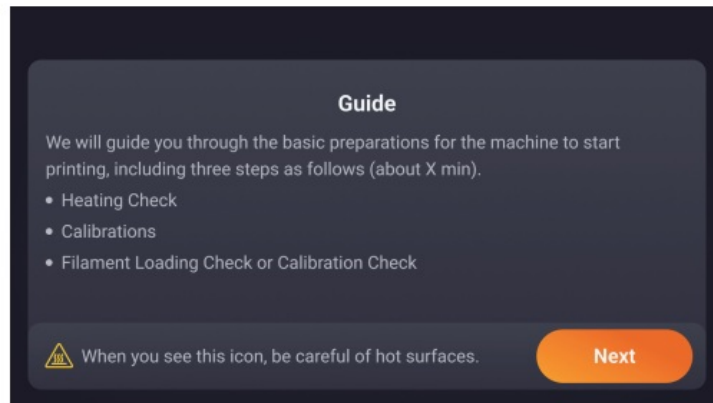

Follow the guidance of the Touchscreen to set up your printer.

- Complete the general settings.

- Follow the Wizard to complete the steps needed to start a print.

Starting a Print

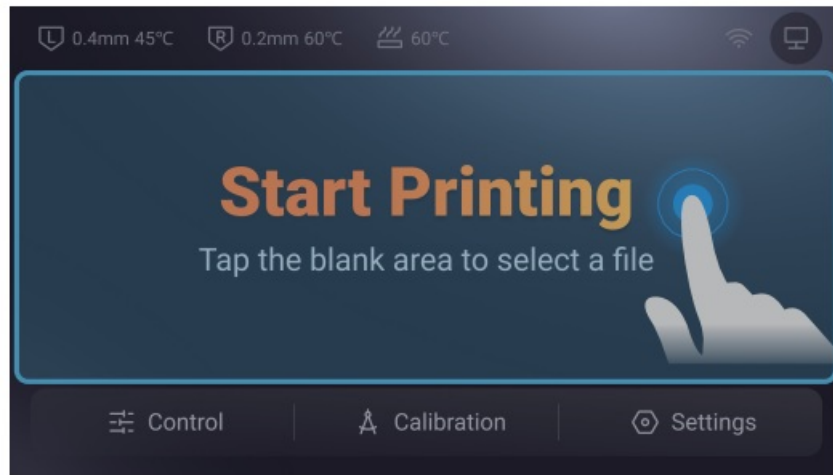

- Download Lava Studio at <https://support.snapmaker.com> and install it on your computer.
- Slice your model and generate the G-code file in Lava Studio.

- Send the G-code file to the printer via Wi-Fi or USB flash drive.

- On the Touchscreen, tap the blank area in the home screen to select the file to print.
