Installation

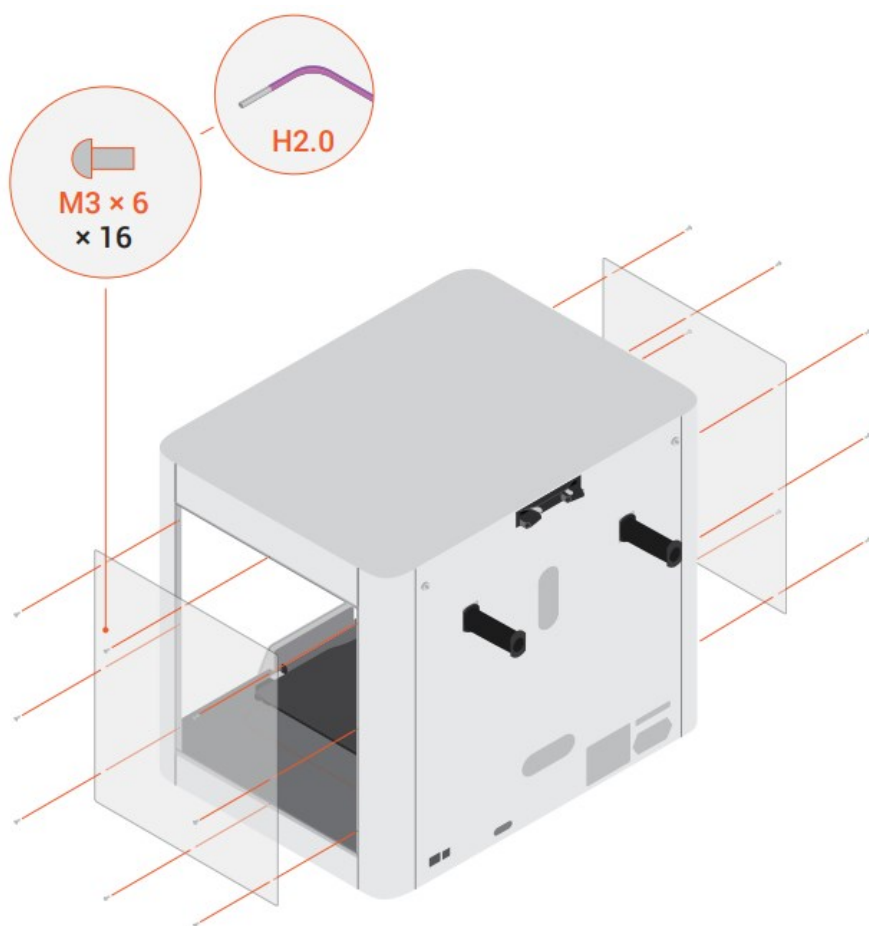

Place the Printer Horizontally

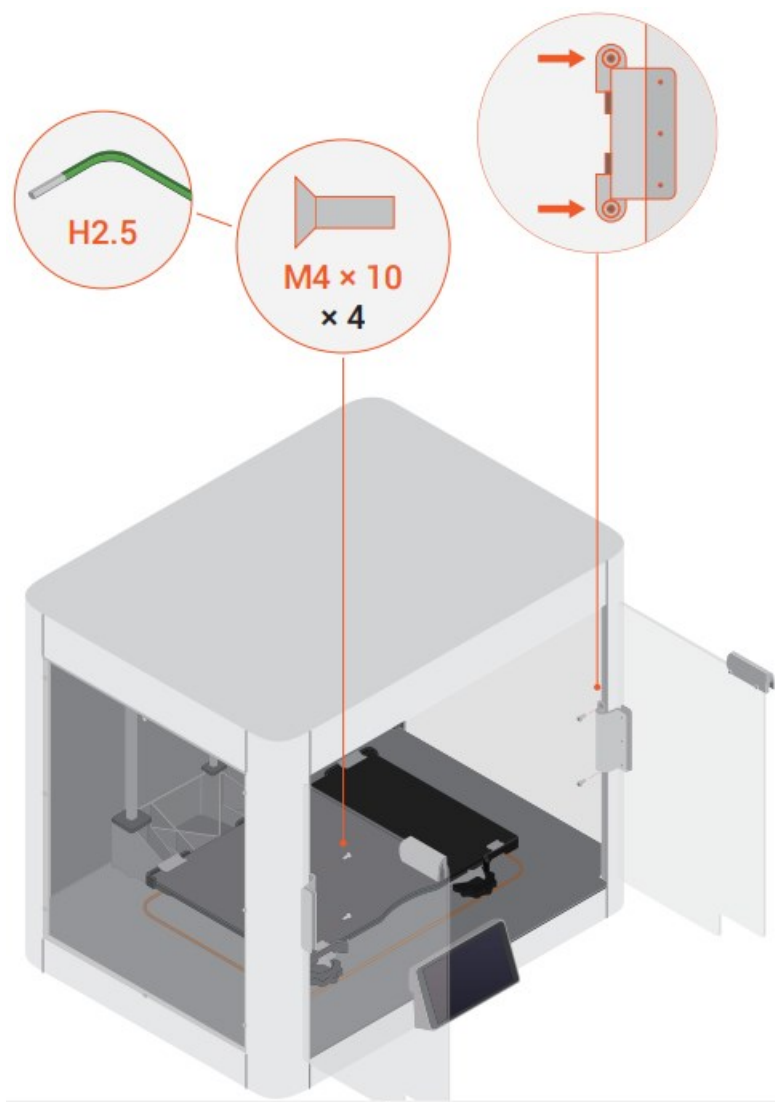

Install Filament Holders

Install Side Panel

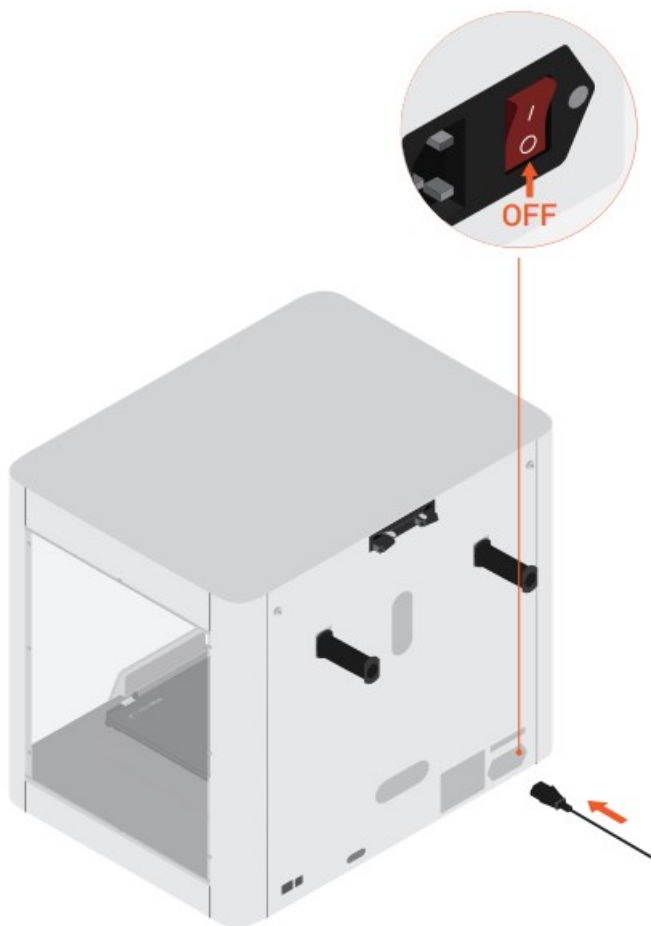

Install Doors

Install the PEI Glass Plate

Connect the Power Cable

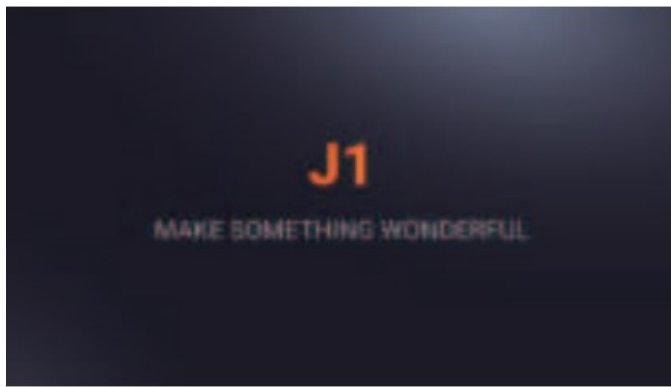

Using the Printer

Turn on the printer

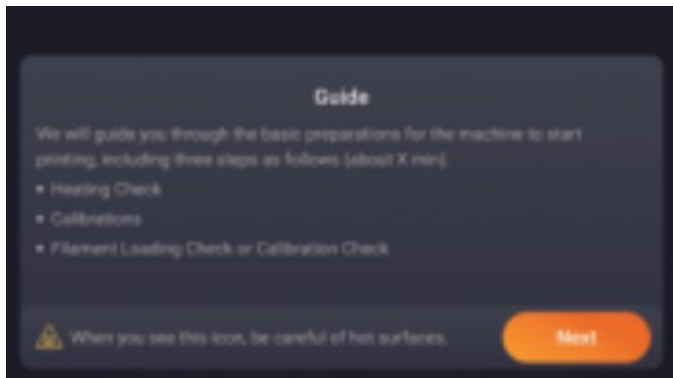

Follow the guidance of the Touchscreen to set up your printer

Complete the general settings

Follow the Wizard to complete the steps needed to start a print

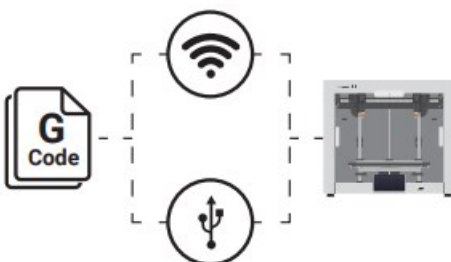

Starting a Print

Download Lava Studio at <https://support.snapmaker.com> and install it on your computer.

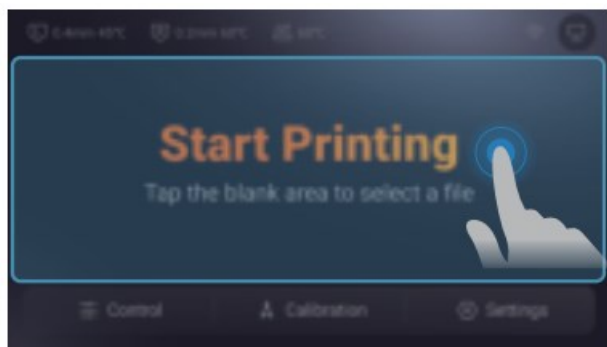

Slice your model and generate the G-code file in Lava Studio

Send the G-code file to the printer via Wi-Fi or USB flash drive.

On the Touchscreen, tap the blank area in the home screen to select the file to print.

Resources
