Learn to surf…

This range of boards is designed by some of the best surf instructors from around the globe for first timers to paddle out on, either in school with an instructor, or on of their own.

Accentuated front and rear rockers makes this board paddle well and take the drop better than most boards out there (no more nose digging or wheelies). Combine this with a large US box for single fins and the board tracks perfectly while turning with ease on the wave.

A Learn to Surf setup with its positioning marks for paddle, hand placement and ultimately foot placement is an instructor favorite as it takes guesswork out of the equation.

The Teacher's Pet brings a sense of security, increases both ride and wave count for beginners and drastically increases progress, thanks to its built-to-learn design. In a sport that hasn't changed much in over 30 years, the Teacher's Pet offers quality and confidence, allowing beginners to progress faster than ever.

Straight A's with the all new Teacher's Pet!

Details:

- Thermoformed PE deck and rail
- Learn to Surf teaching guides with textured deck for easy hand placement
- Multi-textured ridges on the tail for easy learning and foot positions
- CNC-cut and hand-finished EPS core with integrated fiberglass reinforced bamboo stringers
- Bamboo stringers: 7'0 (2) / 8'4 (3) / 10'0 (4)
- PE slick bottom

- Bolt-through leash plug
- Extra strong nose and tail reinforcement on 10'0
- Bottom handle on all boards
- Tool-less 9" dolphin Click center fin, making it easy for **instructors to remove the fin when teaching on the sand**

SPECIAL FEATURES
