## Displaylink

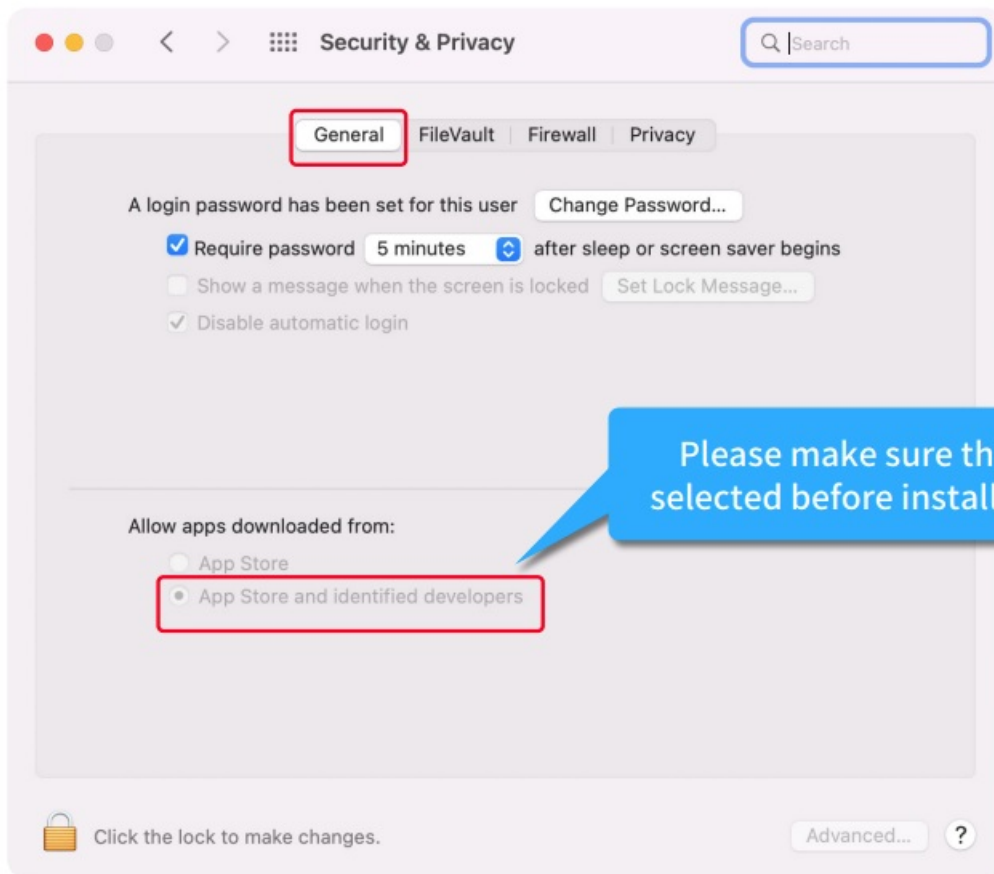

### Displaylink Driver Software

### Installation

Before use, mobile phones, Windows computers, and Mac computers, you need to visit the DisplayLink official website to install the corresponding drivers. The URL is as follows: <https://www.synaptics.com/> or <http://www.displaylink.com/> To promise successful use, please download and update the driver from the DisplayLink official website in time. Note: In order to install the driver for the Mac OS system successfully, you need to check the APP Store and identified developers in the Computer Preferences, Security, and Privacy Settings in advance.

Log in to displaylink  
official website

The screenshot shows the Synaptics homepage. At the top, there is a navigation bar with links for PRODUCTS, APPLICATIONS, TECHNOLOGY, synaptics (logo), DOWNLOADS, COMPANY, and CAREERS. A red box highlights the address bar showing 'synaptics.com'. A blue callout bubble points to the top right corner with the text 'Log in to displaylink official website'. The main banner features a world map with a network overlay and the text 'Synaptics Opens Wireless Research and Development Center in France' with a 'READ PRESS RELEASE' button. Below the banner, the text 'Engineering Exceptional Experiences' is followed by a sub-header 'Synaptics combines Human Interface with IoT and AI technologies to Engineer Exceptional Experiences.' and a central graphic with 'HMI' and 'WHAT YOU TOUCH' and 'WHAT YOU HEAR' labels. A cookie consent bar is at the bottom.

The screenshot shows the Synaptics Downloads page. The navigation bar is the same as the homepage. A red box highlights the 'DOWNLOADS' link in the navigation bar, with a blue callout bubble pointing to it saying 'Click'. The main heading is 'Supported Operating Systems'. Under 'INDIVIDUAL INSTALLERS', there are five buttons: Windows, macOS (highlighted with a red box and a blue callout bubble saying 'Click'), Android, Chrome OS, and Ubuntu. Under 'CORPORATE INSTALLERS', there is a Windows logo. A cookie consent bar is at the bottom.

### INFORMATION ABOUT MACOS 10.15

Some users updating to 10.15 have found their DisplayLink devices have stopped working. 5.2 software is designed to run on Mac OS 10.15, but the OS can disable our kernel extension during the update. Please check the [kernel extension is enabled](#) and [screen recording](#) is also enabled, to ensure DisplayLink enabled devices continue to work when migrating to 10.15.
