**Solac DAF9KQV2Ljs Fast Ionic Blast**

## Product Specifications

- **Brand:** SECADOR
- **Model:** FAST IONIC BLAST
- **Language Options:** ES, EN, FR, IT, DE, NL, RO, PL, BG, EL, AR

## FAQs

**Q: Can I use the SECADOR FAST IONIC BLAST to dry pets?**

A: No, the appliance should not be used to dry pets or animals.

**Q: What should I do before cleaning the device?**

A: Make sure to unplug the device and allow it to cool down before starting the cleaning process.

**Q: Can I use bleach to clean the SECADOR FAST IONIC BLAST?**

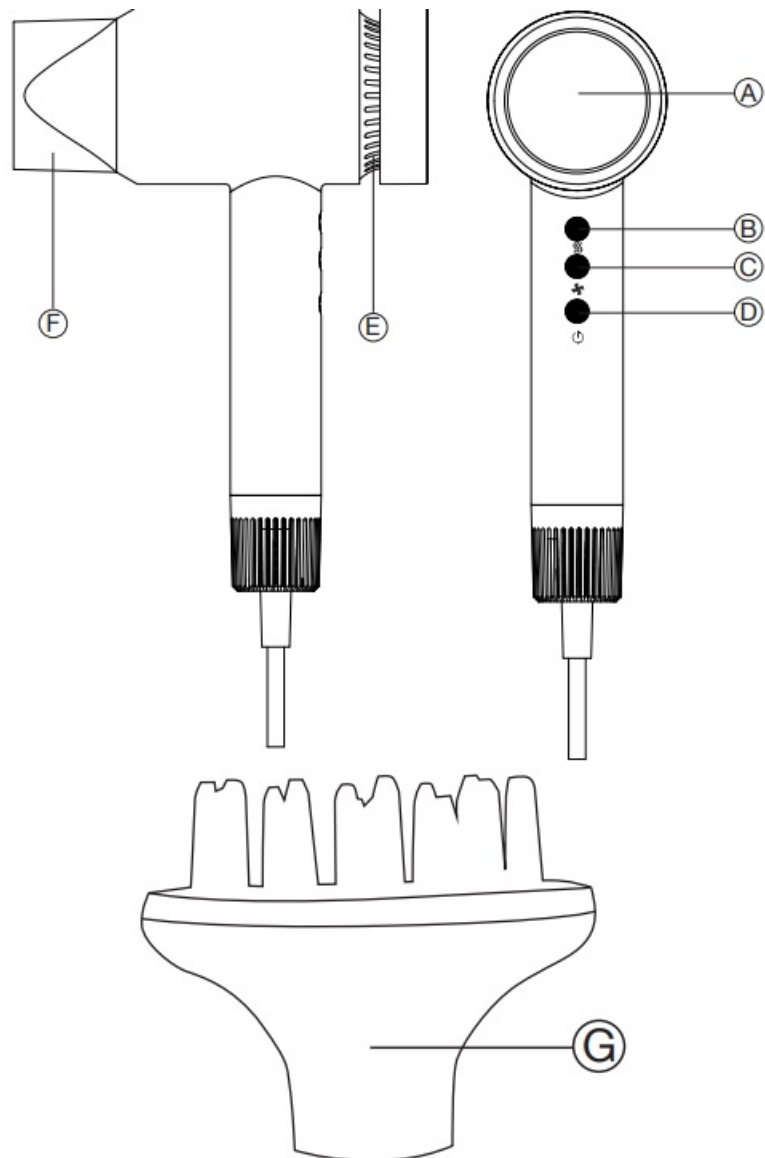

A: No, avoid using bleach or any products with acidic or basic pH factors for cleaning the device.

## OVERVIEW

### Description

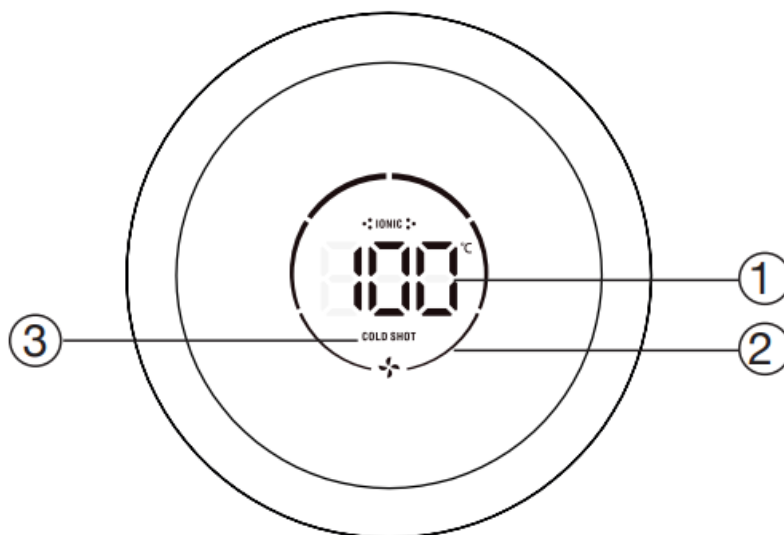

- A – Digital display
- B – Temperature selector
- C – Power selector
- D – On/off button

- E – Air inlet
- F – Concentrator
- G – Diffuser

## DIGITAL SCREEN

- 1 – Temperature
- 2 – Power
- 3 – Cold air mode

If your device model does not have the accessories described above, these can also be purchased separately from the Technical Assistance Services or from the website [www.solac.com](http://www.solac.com)

## USE AND CARE

Before each use, fully extend the power cord of the appliance. Do not use the device if its accessories are not properly attached. Do not use the appliance if the accessories attached to it are defective. Proceed to replace them immediately. Do not use the appliance if its start/stop device does not work. Unplug the appliance from the mains when not in use and before carrying out any cleaning, adjustment, charging, or changing accessories. Keep this appliance out of the reach of children and/or people with reduced physical, sensory, or mental capabilities or lack of experience and knowledge. Do not store the appliance if it is still hot. Check that the ventilation grilles of the appliance are not obstructed by dust, dirt or other objects. Keep the device in good condition. Check that moving parts are not misaligned or stuck, and that there are no broken parts or other conditions that could affect the proper functioning of the appliance. Do not leave the device running while resting on a surface. Do not use the device while it is running while resting on a surface. Do not use the appliance to dry pets or animals. Do not use the appliance to dry textile garments of any kind.

### How to use

#### BEFORE USE

Make sure you have removed all packaging material from the product. Some parts of the appliance have been lightly oiled, consequently, when you start the appliance for the first time it may give off a slight smoke. After a short time this smoke will stop.

#### USE

Fully extend the cable before plugging in. Plug the device into the electrical network. Orient the device to direct the air flow in the desired direction. Start the device by pressing the on/off button (D) for 3 seconds. Select the desired temperature by repeatedly pressing the button (B). The selected temperature will appear on the digital display at all times (100°C, 80°C, 60°C, cold air). Select the desired power by repeatedly pressing the button (C). The selected power will appear on the digital display at all times (soft air, medium soft air, fast air). The maximum operating temperature under normal conditions is up to 100°C.

#### HOW TO DRY HAIR

Move the device in circles to distribute the air evenly through the hair.

## **IONIZER FUNCTION**

The device can generate negative ions. When you turn on the device, it automatically activates the generation of negative ions. Negative ions are useful in eliminating static electricity, reducing hair frizz.

## **ONCE USE OF THE DEVICE IS FINISHED**

Stop the device by pressing the on/off button (D) for 3 seconds. Unplug the device from the electrical network.  
Clean the device

## **ACCESSORIES**

### **Air concentrator accessory (F):**

This accessory serves to concentrate the airflow in a specific area.

### **Diffuser accessory (G):**

This accessory serves to harmonize the airflow in a specific area.

## **Cleaning**

Unplug the appliance from the mains and let it cool before starting any cleaning operation. Clean the appliance with a damp cloth soaked in a few drops of detergent and then dry it. Do not use solvents, or products with an acidic or basic pH factor such as bleach, or abrasive products to clean the device. Do not allow water or other liquid to enter through the ventilation openings to avoid damage to the internal operating parts of the appliance. Do not immerse the device in water or other liquid, or place it under the tap. If the appliance is not kept in a good state of cleanliness, its surface can degrade and inexorably affect the lifespan of the appliance and lead to a dangerous situation. It is recommended to clean once a week.

## **AIR INLET CLEANING**

Clean the air inlet with a toothbrush or towel and remove any dust or hair from this part.

## **FILTER CLEANING**

The air inlet filter must be cleaned periodically for the device to operate properly. To do this, hold the handle of the appliance firmly and turn the filter holder counterclockwise. Remove the filter cover from the product. Remove dust or debris from the filter cover and mesh with a flannel-free cloth or soft brush. Replace the filter cover and turn clockwise. The filter should not be cleaned with water or rubbed too hard.
