LevelVent: Hardware Compatibility
Recommended Firmware & Hardware Configurations

Contents

Software & Firmware

Solinst always recommends using the latest software and firmware release.
Current releases can be downloaded at any time, free of charge, from the Solinst web site at:
https://downloads.solinst.com/
Always use the latest Levelogger® PC Software version to install the latest Firmware versions.
Note: Solinst always recommends that our customers download the data from their LevelVent loggers, using the same Levelogger Software version they were originally programmed with.

Operating System Requirements

Levelogger PC Software Versions 4.6.3 and up are compatible with Windows 10 & 11.

Level Vent Model 3250	Levelogger PC Software	LevelVent Firmware	Solinst Levelogger App	SRU Firmware	DataGrabber Firmware
LevelVent 5 Logger	4.6.3 (Includes Firmware Upgrade Utility 1.4.1)	1.006	3.5.1 iOS 13.0, or later Download on the App Store 2.1.0 Android 9.0, or later GET IT ON Google play	1.001 and up	DataGrabber 5: **Mk2 4.000 and up Mk1 3.002
LevelVent Logger		1.000			DataGrabber 5: Mk2: 4.00 and up Mk1: 3.002 **DataGrabber: 2.000 to 3.002** (firmware version 2.000 and up is user-upgradable, below that, must be upgraded by Solinst)

**Mk2 DataGrabber 5 units sold starting October 2022; Mk1 units sold before then can only be upgraded to firmware 3.002.

LevelVent Accessories

Older style Vented Cables (sold before 4/16/21 with serial numbers lower than 506326) are not compatible with newer style LevelVent 5 Wellheads (sold after 4/14/21 with serial numbers 495959 and up) and Loggers (sold after 4/5/21) without a small user modification – contact Solinst for instructions. Newer style Vented Cables are compatible with all versions of the LevelVent Wellheads and Loggers – please note, after the new Vented Cable connector is fully tightened, the external o-ring on an old Logger or Wellhead is visible and it is normal not to seat against the connector. USB PC Interface Cables are compatible with all LevelVent versions.
