- LAN Control

RF Remote Controller Pairing

Pairing Method:

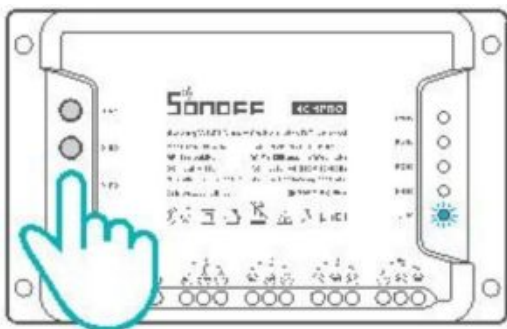

Long press the channel switch that you want to pair for 3s until the LED “flashes quickly once” and release, then short press the remote controller button that your want to pair. The red channel switch button LED “flashes quickly once” indicates that the pairing is successful. Other remote controller buttons can be paired according to this method.

Clearing Method:

Long press the channel switch that you want to clear for 5s until the LED “flashes quickly twice” and release, then short press the remote controller button that your want to clear. The red channel switch button LED “flashes quickly once” indicates that the clearing is successful. Other remote controller buttons can be cleared according to this method.

Factory Reset

Long press the pairing button for about 5s until the Wi-Fi LED indicator changes in a cycle of two short and one long flash and release, then the reset is successful. The device enters quick pairing mode (Touch).

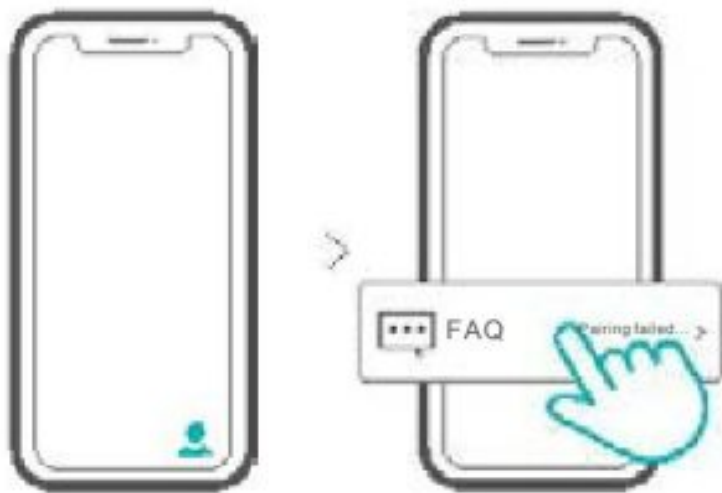

Please reset the switch to factory defaults if you want to change Wi-Fi the network, then reconnect the new network.

Common Problems

Tap “ ” on eWeLink APP and select “FAQ” to check.
