SONOFF D1 Wifi Dimmer

Product Information

The product is manufactured by SONOFF TECHNOLOGIES CO., LTD. It is an electrical device that allows for remote control of connected light bulbs. The device is compatible with incandescent light bulbs and dimmable LED lights. It operates on a power supply of 100-240V AC.
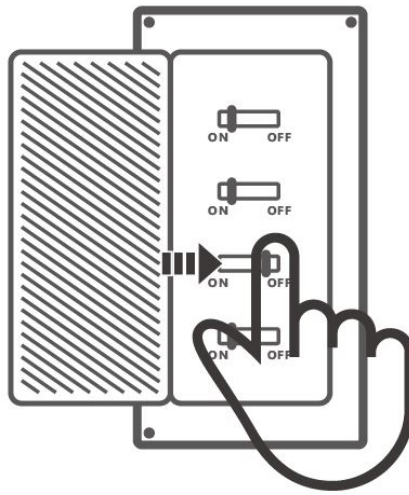

Product Usage Instructions

1. **Power off:** The device has an ON/OFF switch. To turn off the device, switch it to the OFF position.
2. **Wiring instruction:** Connect the device to the power supply using the neutral wire (N In) and live wire (L In). The output connection for the light bulb should be made using the L Out terminal.
3. **Download APP:** Download the eWeLink app from the AndroidTM or iOS app store.
4. **Power on:** After connecting the device to the power supply, it will enter the quick pairing mode (Touch) during the first use. The connected light will enter the breathing mode, indicating successful pairing.
5. **Add the device:** Open the eWeLink app and tap on "Add Device". Follow the prompts on the app to add the device in Quick Pairing mode. You can also add GSM devices or devices with QR code using the respective modes.
6. **Pairing method for device and SONOFF RM433 remote controller:** Refer to the user manual for specific instructions on pairing the device with a SONOFF RM433 remote controller.

Please note that for installation and repair, it is recommended to consult a qualified professional to avoid electric shocks.
During use, do not touch the switch.

Operating Instruction

Power off

To avoid electric shocks, please consult the dealer or a qualified professional for help when installing and repairing! Please do not touch the switch during use.
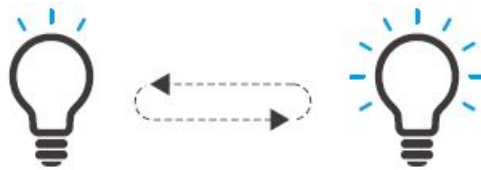

Wiring instruction

- The device can only connect incandescent light bulb and dimmable LED light.
- Make sure the neutral wire and live wire connection is correct.
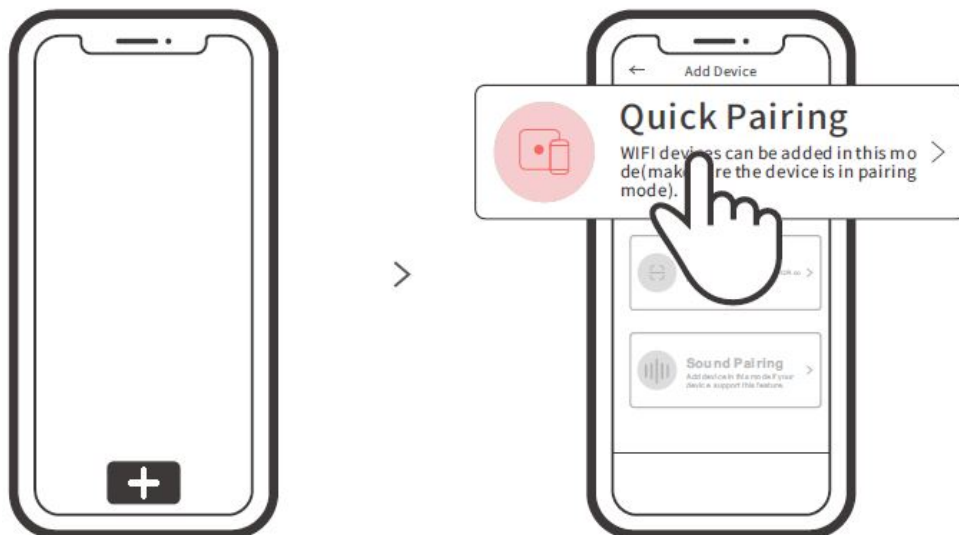

Download APP

Android™ & iOS

Power on

After powering on, the device will enter the quick pairing mode (Touch) during the first use. The connected light enters the "breathing mode".
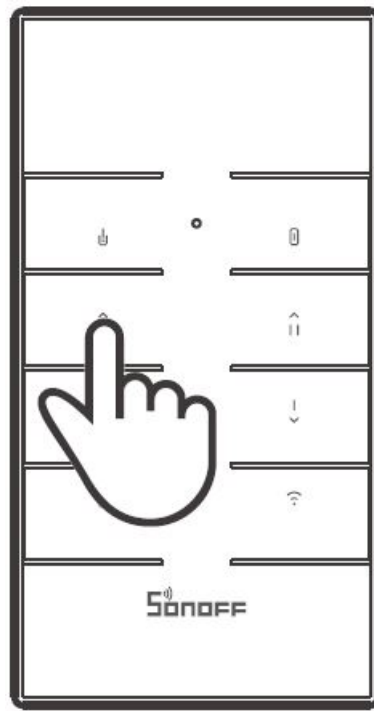

It will exit the quick pairing mode (Touch) if the device is not paired within 3mins. If you need to enter this mode again, please power off and restart the device until the connected light enters the "breathing mode".

Add the device

Tap "+" and select " Quick Pairing ", then operate following the prompt on the app.

Pairing method for the device and SONOFF RM433 remote controller:

< RM433

Short press any button on the RM433 remote controller within 5s after powering on until you hear "Bi", which indicates all buttons are paired successfully.
The RM433 remote controller is not included, please purchase it separately.
