REFRESHING YOUR SPECTRUM RECEIVER

If your Spectrum Receiver isn't working properly, a refresh can help resolve many issues without affecting your recordings or service. If you are experiencing any of the below issues, refreshing your receiver may fix your issues:

- Missing channels
 - Problems with the interactive guide
 - No picture
 - Poor picture quality
- To refresh your receiver:

1. On your PC, go to Spectrum.net and sign in.
2. Hover over My Account and Select TV.
3. Click Refresh in the Equipment screen.

FIXING PICTURE QUALITY ISSUES

There are a couple of easy things you can do to troubleshoot your video picture.

- Check all your cables from your TV to your Spectrum Receiver, and from the Coaxial cable from the wall to your Spectrum Receiver. Make sure they are tight!
- Try refreshing your receiver on Spectrum.net under Manage Account.
- If cables are tight, unplug your receiver for 15 seconds and then plug it back in and power on. It may take several minutes for the receiver to reboot. Once it's rebooted, check the video picture.

IN-HOME WIFI

WHERE TO PLACE YOUR ROUTER FOR THE BEST CONNECTION:

Place your Modem-Router combo or WiFi Router in a central and open location. We recommend a wired Internet connection for high bandwidth usage devices such as Smart TVs, TV streaming devices and gaming consoles—this helps avoid interference and increases available WiFi bandwidth for other devices.

DO place:

- in a central location
- on a raised surface
- in an open space

DON'T place:

- in a media center or closet
- near wireless or radio signals like cordless phones
- behind a TV

TROUBLESHOOTING YOUR INTERNET SERVICE

If you are experiencing slow speeds or if your WiFi connection is intermittent, check the following:

- Distance from the Modem-Router or WiFi Router: The farther away from the WiFi Router you are, the weaker your signal will be. Try moving closer to your WiFi Router to see if the connection improves. WiFi signal strength may deteriorate over longer distances and as it passes through the construction materials of your home.
- Modem-Router or WiFi Router Location and Obstacles: Your WiFi Router should be placed in a central location for best coverage. Learn more at [Spectrum.net/WiFiTrouble](https://www.spectrum.net/wifitrouble)

If you still continue to experience slow speeds, try resetting your Internet modem by following these steps:

1. Unplug the power cord from the back of the modem.
2. Wait 30 seconds, then reconnect power to the modem.
3. Wait two minutes to allow the modem to connect. The modem connection lights will be solid.
4. Confirm you are connected to the Internet by surfing to two or more web pages.

ENHANCED 911 (E911)

To reach fire, police or ambulance services, just dial 911. To help you remember to dial 911 IMMEDIATELY in case of any emergency, we've provided stickers to place on or near your phone. Enhanced 911 (E911) automatically provides the emergency service operator with your phone number and location. To ensure that 911 calls are properly routed:

- Don't move the equipment installed in your home to another location.
- If you use our service from an address that's different from the one you initially provided, the E911 service won't work properly.
- When you plan to move and need to change your service address, please call Customer Care so that we can properly move your service.

BATTERY BACKUP

Spectrum Voice uses the electrical power in your home, so if there's a power outage all calling will be interrupted—including 911 service. Ask us about purchasing and installing a battery backup, which provides hours of standby Voice service in the event of a power outage—just call (855) 757-7328. Can Roku replace Spectrum cable box?

Streaming devices like the Roku, Fire TV, and Apple TV have the Spectrum TV app in their app stores and have the same functionality that the app on the phone offers. You'll need to be signed for Spectrum TV and internet to stream on other devices, so make sure your internet is from Spectrum before proceeding.¹

Is Spectrum streaming better than cable?

Yes, streaming services are better than cable, as long as your internet speeds are fast enough for streaming. You can still watch all your favorite live channels while paying less than most traditional cable TV plans cost, especially once you factor in hidden cable TV fees.

Which TV streaming service is best?

But despite all that, **Hulu Plus Live TV** is still second banana to our top live TV streaming premium pick, YouTube TV. While its channel selection still isn't as robust as YouTube TV and FuboTV, it's Hulu's significant catalog of on-demand content which helps set it apart

Does Spectrum have Amazon Prime?

Access to more than 400 On Demand movie titles from Lionsgate, Sony, Disney, IFC, Paramount, Universal and Warner Brothers with more titles coming in the future. Multiple viewing options – **You can use Spectrum TV or a streaming service of your choice such as Hulu, Netflix or Amazon Prime.**

Why does Spectrum have 2 of the same channel?

Spectrum has duplicate channels **due to the quality of the channels.** Spectrum has channels in standard definition, and the duplicate version is high definition. This allows people with a basic or enhanced package to watch the same beloved channels no matter their package level.
