SPEKTRUM Dashboard Change Log

Product Information

Specifications

- Product: SpektrumTM Dashboard
- Operating System Compatibility:
  - Android Version: 23.05
  - iOS Version: 11.0
- Release Date: April 16, 2025

Product Usage Instructions

Installation

1. Download the SpektrumTM Dashboard app from the Google Play Store for Android devices or the App Store for iOS devices.
2. Follow the on-screen instructions to install the app on your device.

Compatibility

Ensure your Android device is running Version 23.05 or later and your iOS device is running Version 11.0 or later to use all features of the SpektrumTM Dashboard app.

Using the App

Launch the SpektrumTM Dashboard app on your device to access the features and functionalities provided. Refer to the app's user manual for detailed instructions on how to navigate and utilize its capabilities.

Updating the App

Check for updates regularly on the Google Play Store or App Store to ensure you have the latest version of the SpektrumTM Dashboard app with all the latest features and improvements.

Android Version 23.05

All changes are relative to version 23.03.

Corrections & Improvements

- Removed the permissions popup, as it was redundant to the Android OS version.
- Corrected the time window formatting in the Basic Setup screen.
- Fixed Dashboard sticking to one telemetry display type regardless of actual setting

when connected to a Promoto.

- Fixed a crash reading firmware update files if the user didn't grant a permission that wasn't needed.
- Removed the Model Setup tab.
- Added a Bluetooth permissions check before opening the Bluetooth Devices screen.
- No longer request the camera and picture permissions, as those were only used for the Model Setup tab.
- Added support for the DX3 MT.
- Updated the DX3 firmware to 1.11.11.

iOS Version 11.0

All changes are relative to version 10.0.

Corrections & Improvements

- Removed the "Displayed?" property from the telemetry settings.
- Removed the social media integration, as it has been deprecated for some time.
- Corrected the Aux Point screen's position slider range.
- Corrected the background color of the Aux Point screen.
- Corrected the background color of unused Bluetooth Devices screen lines.
- Made the controls in the Telemetry Setup screen easier to use.
- Corrected Imperial and Metric unit labels when the setting changed.
- Fixed long-tapping gauges on the expanded SMART panel view so the application would go to the correct screen.
- Fixed an issue where the Status screen would disappear after a BLE connection.
- Added a way to close the keyboard after entering text without closing the current screen.
- Removed the Model Setup screen.

Frequently Asked Questions

- **Q: How often should I check for updates?**
  A: It is recommended to check for updates periodically, at least once a month, to ensure you are benefiting from the latest enhancements and bug fixes.
- **Q: Can I use the SpektrumTM Dashboard app on older Android or iOS versions?**

A: The app is designed to work optimally on Android Version 23.05 or later and iOS Version 11.0 or later. Using older versions may result in limited functionality or compatibility issues.
