Product Information

Specifications

- Product Name: Insulation Set SPIROVENT
- Model Numbers: TUR100, TUR125, TUR150, TUR200
- Length: 140mm (for TUR100) and 210mm (for TUR125, TUR150, TUR200)
- Website: www.spirotech.com

Product Usage Instructions

Installation

1. Identify the appropriate model number for your system (TUR100, TUR125, TUR150, TUR200).
2. Ensure the length of the insulation set matches the specifications provided (140mm for TUR100, 210mm for TUR125, TUR150, and TUR200).
3. Follow the installation guidelines provided in the user manual to securely attach the insulation set to the designated component.

Maintenance

Regularly check the insulation set for any signs of wear or damage. Replace if necessary to maintain optimal performance.

Cleaning

Use a damp cloth to gently clean the surface of the insulation set. Avoid using harsh chemicals that may damage the material.

FAQ

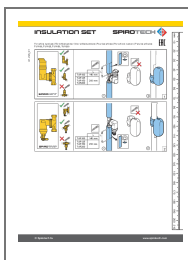

Q: How often should I check the insulation set for maintenance?

A: It is recommended to check the insulation set for maintenance at least once every six months or as needed based on usage and environmental conditions.

Q: Can I trim the insulation set to fit a specific length?

A: It is not recommended to trim the insulation set as it may affect its performance and ability to provide proper insulation. Choose the appropriate model with the correct length for your system.
