MINIX20 Smart Wireless Headset

❖ **caution:**

The " quick charger " cannot be used while charging.
All charging adapters with the QC mark cannot be used.

First use pairing method

1. Remove the earphone from the charging box, wait for 1 second after turning on the power, and wait until the blue and red lamps on the earphone blink alternately
2. Launch Bluetooth on your smartphone, search for available equipment "SQRMINI-X20" and click on it. Pair connection is started, and voice is presented after successful connection.

When using for the second time, pairing is not necessary, the earphone automatically connects to the Bluetooth of the smartphone

Easy operation with one

Play music/pause: click on the MFB button while music is playing

Next song: click the MFB button three times quickly while music is playing

Answer the phone: when on an incoming call, press the MFB button once

Hang up: while on a call, press the MFB button once

Do not answer: when a call comes in, press the MFB button for 2 seconds to say "do not answer the call"

Redial: Double press the MFB button and the headset means to dial the last number received/hanged up

Turn off: ① Put the headset directly into the charging case after the Bluetooth connection is cut off

② Press and hold the MFB button to switch off the phone.

Guide audio

English, Japanese (switchable)

With the Bluetooth off, press the button twice in quick succession.

IPX5 waterproof design

- IPX5 waterproof design protects earphones from sweat, splash, rain etc. and can listen comfortably while

exercising.

※ **Note:** The charging case is not waterproof.

Common problems and solutions in use

Q: What if the headset is not charging?

A: In most cases, there are foreign matters, inconsistent with the hole of the charger and other poor contact problems.

1. Check that there are no foreign objects in the two metal holes of the earphone, and wipe them with your hand or a cloth with alcohol.
2. (Charge case) Check if there is electricity and charge for more than 10 minutes.
3. The power was not turned on and the battery could not be charged, but just in case, if you leave it in the USB for about 30 minutes, the red lamp will light up. The blue lamp lights up in about an hour. If it can be used smoothly later, the battery is in a suspended state before that.

※ If the above method does not respond, hold the two metal bumps of the charger and the earphone together with the earphone. If there is no response, it can be judged that the contact is basically poor. Contact us on the spot.

※ **Note:**

The blue light on the charging case will flash when charging. The blue light will be on if it is fully charged.

Product specification

Bluetooth: V5.1

(upgrade from the previous version 5.0 to 5.1)

Music time: 3-4 hours

Charging time: 1.5 hours

Standby time: 150 hours

Sound quality: HD high quality

Weight: Earphone 3g

Weight of charging box: 15g

Charging box size: 40*30*20MM

Battery capacity: 55mah

Battery box capacity: 260mAh (can be charged 3-4 times)

Input voltage: DC5V-1A(max)

Input current: 1A

Operating range: 10-15M radius (without obstruction)

Guide voice: English, Japanese (switchable)

Quality guarantee

If there is any quality problem within 3 months, we will replace the product free of charge.

How to contact us

When you are logged in to Amazon, go to the order history of your account service, and click "Contact Seller" on the right side of the corresponding order, contact the seller.

Dear customers,

Thank you very much for purchasing our invisible single ear headset.

Our company is a professional distributor specialising in the sale of Bluetooth headsets for several years, dealing with Bluetooth headsets all over Europe, the USA, Japan and other countries. In the future, we will make more efforts to enrich our products to satisfy our customers. We are aiming to upgrade and improve our products, and to offer more new products. Please look forward to it!

Note: SQRMINI is the only recognised brand. If there are other shops selling our products, there is a good chance that they are counterfeit and inferior.

All our products are carefully packed and shipped after full shipping inspection. In the unlikely event that there are any problems during use, the products can be exchanged for new products free of charge within 3 months of normal use and quality problems. Please be sure to contact me through Amazon from the order history.

We will show 100% sincerity and solve problems for customers from the perspective of customers. so please contact us in the first instance if there is any problem! Please do give me the opportunity to improve!

Your encouragement is the energy of our company. If possible, we hope our products can accompany you all the time and provide you with high-quality and satisfactory service.

Thanks & Best Regards,

SQRMINI Customer Service Team

ISED Canada Statement:

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada 's licence exempt RSS(s). Operation is subject to the following two conditions:

1. this device may not cause interference and
2. this device must accept any interference, including interference that may cause undesired operation of the device.

Radiation Exposure: This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment

To maintain compliance with IC's RF Exposure guidelines,

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable

exposure condition without restriction.
